Sustainability Symbols

Planet Friendly

A product earns the Planet Friendly symbol if it meets one of the following criteria: recyclable, reusable, biodegradable, compostable, comprises at least 20% recycled materials, certified for environmental responsibility, or made from sustainable resources

Recycled Content

Products that contain at least 20% recycled materials - % of recycled content is indicated

Reusable

Designed to be reusable for multiple uses or reuse cycles within a designed system

Compostable & Biodegradable

Products made of organic matter biodegrades naturally in specific composting environments

Recyclable

Products that are recyclable after use in regular kerbside or via recycling programs

Biodegradable

Products that breakdown through natural processes, leaving no harmful residues

Environmentally Accredited

Products with Environmental Certifications associated with responsible and sustainable sourcing, manufacture, material, or end of life

Welcome to the MOS Mailroom & Packaging Solutions Catalogue

As businesses grow and diversify, efficiency and reliability in mailroom operations are more important than ever. We know that every package you send reflects your business, and having the right supplies can make all the difference.

A streamlined mailroom keeps your business running smoothly, reducing errors, improving productivity, and facilitating effective internal and external communication. Whether you're processing bulk shipments, sorting daily mail, or looking for eco-friendly packaging alternatives, our solutions help you stay ahead.

We're excited to introduce our Mailroom & Packaging Catalogue—a comprehensive resource designed to support businesses of all sizes. From durable packaging and advanced labelling machines to time-saving dispensers and mailroom essentials, it's designed to boost productivity for businesses of all sizes. Our range also includes eco-friendly solutions like biodegradable tape, ecomailers, kraft paper, and more to help reduce waste and support your sustainability goals.

With its profound meaning of 'Pathway', Muru has remained true to its commitment to paving the way for future generations. As a testament to this dedication, over the last decade, Muru Office Supplies has evolved into purpose driven and community-focused organisation that is majority First Nations owned and operated. With over 80% of our dedicated team being First Nations descent, we bring diverse perspectives and expertise to our collective mission. As a 100% Australian-owned company certified by Supply Nation, we prioritise both commercial success and social impact. A portion of our profits is dedicated to enhancing education, employment, and health initiatives that benefit First Nations communities.

Since 2014, Muru has contributed more than \$820k to support First Nations communities in the focus areas of Education, Employment, and Health & Wellbeing through the sale of workplace supplies.

Thank you for your continued support and for being a part of the MOS journey.

Mitchell Ross

Mitchell Ross
CEO

Why MOS?

Australia's Largest First Nations Majority Owned Office Products Supplier with the Best Range

FIRST NATIONS OWNED

In 2012, Mitchell Ross, a proud Bidjigal man, founded Muru Group to make a lasting difference for First Nations peoples and became a catalyst for positive change and a pathway to a brighter future. In 2014, Muru Group partnered with COS® to form Muru Office Supplies a majority First Nations owned and operated workplace products supplier.

Muru, meaning 'Pathway,' has become one of Australia's largest First Nations majority-owned and operated workplace supplies companies, offering a wide range of products for every room in the office.

Over 80 percent of employees are of First Nations descent, empowering their collective mission through their unique perspectives and expertise. Certified by Supply Nation, Muru dedicates a percentage of profits to support First Nations communities in education, employment, health, and wellbeing.

EXPANSIVE PRODUCT RANGE

Muru Group, a strong advocate for First Nations businesses, launched a stationery product line in 2014 featuring unique designs by a First Nations artist. This initiative not only contributes to the development of sustainable First Nations communities but also promotes cultural representation in the workplace.

The Muru range now includes 60 items, with over 4 million products sold from office supplies, copy paper, kitchen and bathroom products. Popular items are the Muru Notebooks and Muru 100% Recycled Paper, showcasing their appeal and commitment to sustainability. By incorporating First Nations aesthetics, Muru promotes cultural understanding, diversity, and sustainable development in First Nations communities.

COMMUNITY MINDED

Each purchase from Muru, supports First Nations communities with over \$820k contributed since 2014. A key Muru initiative is an early childhood education program in North Queensland that provides free access to structured play for over 30 First Nations children, aiding their transition into public school.

Muru also supports IndigiGrow, a social enterprise creating sustainable opportunities for First Nations peoples through the cultivation, production, and sale of native plants. Youth are given horticultural trade skills and employment opportunities while learning about the cultural significance of native plants and bush foods.

A new initiative supported by Muru is Women's Business Second Chance Hub in WA supporting First Nations women who have experienced disadvantage or adversity to overcome barriers and achieve success in starting or growing their own businesses.

LOCAL WAREHOUSE & DELIVERY

Muru is powered by COS®, who have invested heavily in creating a nation-wide presence, with an extensive network of sales offices, warehouses and distribution centres across Australia. Each branch is tailored to local requirements and delivers a local service experience.

Our warehouses are quality assured, state-of-the-art facilities with advanced technology to ensure industry leading order accuracy. We maintain all our logistical services in-house with the flexibility to provide a range of additional services.

COMPLETE ORDERING SOLUTION

We thrive on creating innovative solutions for the workplace of the future. Our online ordering system, MOSnet, has been designed with our customers in mind and with intuitive time saving features.

Fast Ordering

- Create unlimited favourites lists
- Build an order over time
- Your login will retrieve all your personal preferences
- Easy repeat ordering
- Online returns
- Set and forget your regular orders using Scheduled Orders

Advanced Searching

- Narrow your search by brand or eco-conscious
- Easy to use toner & ink finder
- Speak to a MOSnet specialist on Live Chat
- Real-time local warehouse stock availability
- Compare feature
- Prediction searching
- Barcode scanning

Increased Control

- Password and security access
- Easy order tracking with order delivery updates
- Savings alternatives offered for better value
- Apply your procurement business rules including authorisation process
- Instant itemised monthly and year-to-date expenditure reporting
- Nominate a delivery date that suits you

Specialist Range

Explore our specialist range, designed to showcase the best we offer in each category, with a focus on boosting your team's health, productivity, and safety.

KITCHEN & HYGIENE

A clean and hygienic workplace is essential for staff wellbeing, reducing the spread of illness, and enhancing productivity. Beyond safety and health, a well-stocked kitchen is the key to keeping your team hydrated and nourished throughout the day. Discover our range designed to support wellness and efficiency, ensuring your team's health, happiness, and safety.

- Beverages & Snacks
- Kitchen Appliances
- Hygiene Essentials
- Cleaning Liquids & Chemicals

FIRST NATIONS

Our First Nations product range is carefully curated from businesses that are owned and operated by First Nations peoples. At MOS, we are committed to supporting suppliers who not only create meaningful impact within their communities by offering ethically produced products to Australian workplaces, but also foster community growth and sustainability. A portion of our profits is dedicated to enhancing education, employment, and health initiatives that benefit First Nations communities.

Our diverse range of First Nations products includes:

- Office and Education Products
- Cleaning & Hygiene
- Kitchen & Catering

EXCLUSIVE RANGE

Explore MOS Exclusive Brands for premium products that offer great value without sacrificing quality. Our carefully selected range provides smart, cost-effective choices across various categories, designed to meet and exceed your needs. With decades of expertise, we deliver specialised solutions that enhance the productivity, health, and safety of your team.

- Office Furniture & Technology Accessories
- Bathroom & Cleaning Supplies
- Binding, Mailroom, & Packaging
- Education, Writing & Paper

ECO-CONSCIOUS RANGE

As organisations prioritise social, economic, and environmental sustainability, opting for eco-friendly products is key to corporate responsibility. By partnering with MOS, you gain access to our eco-conscious expertise and solutions. We offer a range of sustainable options, including recycled paper, FSC-certified stationery, eco-friendly office furniture, and supplies designed to minimise your carbon footprint while supporting a healthier planet.

- Kitchen & Cleaning Supplies
- Recycled Copy Paper
- Writing Instruments & Education Supplies
- Office Furniture

WORKPLACE SAFETY & FIRST AID

From everyday essentials PPE to specialised safety solutions, our product range is tailored to meet the diverse needs of various industries, helping businesses safeguard their employees and minimise workplace risks. Whether you're refreshing first aid supplies or enhancing safety protocols, MOS offers the right products to ensure your workplace remains safe, compliant, and prepared for any emergency situation.

- Clothing & Footwear
- Safety Cap & Hat Accessories
- Eye, Ear, Respiratory & Hand Protection
- First Aid Kits, Fire Extinguishers, Safety Signs & PPE

TECHNOLOGY & FURNITURE

Elevate your office environment with our state-of-the-art technology, modern furniture, and ergonomic solutions designed to maximise productivity and enhance comfort. Whether you're upgrading your technology, revamping your office furniture, or improving workplace ergonomics, our specialist solutions help you create a dynamic, efficient, and inviting workspace.

- Ergonomic Accessories
- Furniture & Storage
- Collaborative Education Furniture
- Technology Essentials

Trends in Sustainable Packaging

Did you Know?

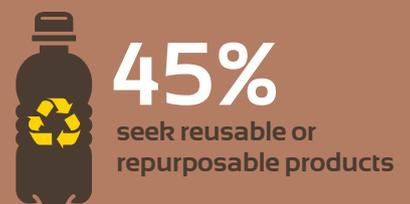

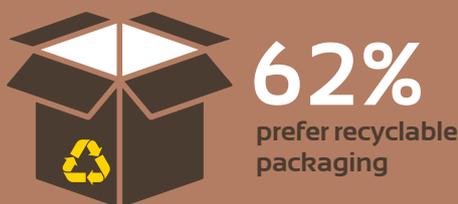

The green packaging market is projected to grow at a
6.1%
compound annual rate from 2020 to 2028.

As of 2022-23, businesses reached
44% recycled content in packaging - working toward 50% target

Over **50%** of businesses are now using new recycling labels on their packaging.

How Shoppers Assess Product Sustainability:

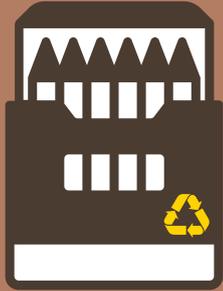

The Australian Packaging Covenant Organisation (APCO) aims for all packaging to be reusable, recyclable, or compostable by 2025.

Sources:
Australian Packaging Covenant Organisation. National Packaging Targets. Retrieved from <https://apco.org.au/national-packaging-targets>
Veolia Australia and New Zealand. Australians want recyclable packaging. Retrieved from <https://www.anz.veolia.com/newsroom/australians-want-recyclable-packaging>

Sustainable Packaging Goals

As our partner, COS provides MOS with the added benefit of their innovative packaging solutions, leveraging the latest technology to boost our productivity and sustainability initiatives.

45%

of primary packaging is made from recycled material containing an average 76% recycled content.

55%

of packaging is now completely free of soft plastic.

89%

of shipping cartons are made from an average of 94% recycled content.

18%

of exclusive products now feature Australasian Recycling Labels (ARL) for responsible disposal.

We are committed towards a circular economy for packaging and our targets align with the APCO 2025 National Packaging Targets.

- **100%** of packaging to be recyclable, renewable or compostable
- **70%** of plastic packaging to be recycled or composted
- **50%** average recycled content included in packaging
- Phase-out of problematic material & unnecessary single-use plastic

Strategies for Sustainable Packaging Practices

In recent years, there has been a growing demand for sustainable packaging alternatives both in Australia and globally. This demand has been driven by a heightened awareness of plastic waste's environmental impact. Every day, businesses encounter an array of packaging materials, including plastic bags, plastic films, hard plastic packaging and bubble wraps for protecting electronic devices during transportation.

Despite its practical benefits, plastic packaging is a major environmental threat, contributing to landfill waste and pollution. Businesses all over the world heavily rely on packaging materials to ensure the efficiency and convenience of supply chains and retail operations.

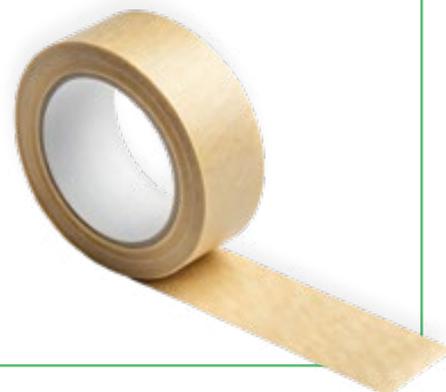

For businesses, addressing environmental and sustainability goals requires packaging designed for easy recovery, reuse, recycling, and safe processing. With the Australian resale market surpassing \$60 billion in 2022, consumers are prioritising goods that are locally sourced, ethically produced, and packaged in recyclable materials.

Businesses are now exploring new strategies to reduce their environmental footprint through sustainable packaging solutions. By embracing innovative solutions such as Ecomailers, Hexwrap, and Recycled Kraft Paper, businesses can not only meet consumer expectations but can also contribute to the preservation of the planet.

KRAFT TAPE

Kraft Tape is a sustainable alternative to conventional plastic packaging tape. Made from recycled paper and natural adhesives, kraft tape is both recyclable and compostable, making it ideal for businesses looking to reduce single-use plastics. Kraft tape can be used on cardboard boxes and other paper-based packaging, providing a strong, tamper-evident seal while keeping the entire package recyclable.

Unlike plastic-based tapes, which often need to be removed before recycling, kraft tape can be processed along with cartons, which can help streamline waste sorting and support circular packaging practices.

ECOMAILERS

Ecomailers, also known as compostable or biodegradable mailers, have emerged as a popular choice for eco-conscious businesses looking to minimise their environmental footprint. These mailers are made from renewable resources like cornstarch or PLA (polylactic acid), which break down naturally without leaving harmful residues effectively, and contain no plastic.

According to the Australian Packaging Covenant Organisation (APCO), Australia generates approximately 76 million tonnes of waste each year, with packaging materials contributing significantly to this figure. By switching to Ecomailers, your organisation can significantly reduce their contribution to landfill waste and demonstrate their commitment to sustainability.

HEX WRAP

Hex Wrap is an eco-friendly alternative to plastic bubble wrap, designed to protect fragile items during shipping while reducing material waste. It features a honeycomb structure that cushions items effectively without the need for plastic-based fillers. Unlike traditional bubble wrap, which is made from non-biodegradable plastic materials, Hex Wrap is 100% recyclable and compostable. Research conducted by the Commonwealth Scientific and Industrial Research Organisation (CSIRO) indicates that Australians discard over 2.7 million tonnes of plastic waste annually, with plastic packaging materials being a major contributor. By switching to Hex Wrap, businesses can reduce their reliance on non-biodegradable plastic wrap and support responsible sourcing and waste reduction practices.

RECYCLED KRAFT PAPER

Recycled Kraft Paper is another eco-friendly option for packaging materials, derived from post-consumer waste. Recycled kraft paper offers a sustainable alternative to virgin paper products, as the wrapping can go straight into their recycling or compost bin. Recycled kraft paper is a practical choice for wrapping, void fill, and cushioning, especially for environmentally conscious businesses. By using recycled kraft paper, businesses can reduce demand for virgin pulp, close the recycling loop, and meet sustainability goals without sacrificing function or efficiency.

BIODEGRADABLE STRETCH WRAP

Plastic stretch wrap is essential for securing pallet loads, but it also contributes heavily to landfill waste. Biodegradable Hand Stretch Wrap offers a more sustainable alternative: it functions like conventional stretch film but is designed to biodegrade significantly faster once disposed of in landfill conditions. Ideal for logistics and warehouse operations, this black, hand-applied wrap helps reduce plastic pollution without compromising on load stability. Switching to biodegradable wraps allows businesses to meet operational needs while supporting environmental goals.

Using Packaging for Brand Awareness

In today's competitive marketplace, every aspect of a business's presentation matters, including its packaging. Packaging customisation and branding offer unique opportunities to reflect brand identity, engage customers, and stand out from the competition. From custom-printed boxes to personalised packing tape, there are numerous ways businesses can leverage packaging materials as a powerful marketing tool.

Reflecting Brand Identity through Creative Packaging

Packaging serves as a tangible representation of a brand's identity and values. Customising packaging materials allows businesses to convey their unique personality and establish a distinct brand image. Whether it's through colour schemes, typography, or design elements, packaging can effectively communicate a brand's story and ethos to consumers.

For example, a company known for its eco-friendly practices may opt for sustainable packaging materials such as recycled

cardboard boxes or biodegradable packing peanuts. This not only reinforces the brand's commitment to sustainability but also resonates with environmentally conscious consumers.

Similarly, luxury brands may choose to use premium packaging materials such as embossed boxes, satin ribbons, or metallic foils to convey exclusivity and sophistication. By aligning packaging design with brand identity, businesses can create a cohesive and memorable brand experience for customers.

Custom-Printed Shipping Boxes: Making a Lasting Impression

Custom-printed boxes offer businesses a versatile platform to showcase their brand identity and leave a lasting impression on customers. Whether it's through bold graphics, vibrant colours, or eye-catching logos, custom-printed boxes can effectively reinforce brand recognition and recall.

For e-commerce businesses, custom-printed shipping boxes serve as the first point of contact with customers. By incorporating branded elements into the packaging design, businesses can create a memorable unboxing experience that resonates with customers long after the purchase is made.

Moreover, custom-printed boxes can be tailored to suit specific product offerings or promotional campaigns. For example, seasonal variations or limited-edition designs can add a sense of urgency and exclusivity, driving sales and engagement among customers.

Personalised Packing Tape: Adding a Personal Touch

Personalised packing tape is another creative way to enhance brand visibility and create a memorable unboxing experience for customers. By incorporating logos, slogans, or brand messaging onto packing tape, businesses can add a personal touch to their packaging while reinforcing brand recognition.

In addition to branding, personalised packing tape can also serve as a security feature, providing tamper-evident protection and ensuring the integrity of shipments during transit. This not only instils confidence in customers but also enhances the perceived value of the product and brand.

Examples of Packaging as a Marketing Tool

Many Australian companies have successfully leveraged their packaging and shipping materials as powerful branding tools to enhance brand awareness and leave a lasting impression on customers.

- 1 One notable example is Koala, an Australian mattress-in-a-box retailer known for its distinctive packaging design. Koala's packaging features playful graphics, bold colours, and witty slogans that reflect the brand's personality and values, creating a unique and engaging unboxing experience for customers.
- 2 Another example is Frank Body, a Melbourne-based skincare brand famous for its coffee-based body scrubs. Frank Body's packaging is not only aesthetically pleasing but also environmentally friendly, with sustainable materials and eco-conscious designs. The brand's attention to detail in packaging reinforces its commitment to sustainability and appeals to environmentally-conscious consumers.
- 3 Fashion retailer Showpo utilises custom-printed boxes and personalised packing tape to elevate its brand presence and create a cohesive brand experience. Showpo's packaging reflects the brand's vibrant and playful aesthetic, with eye-catching designs and branding elements designed to resonate with its target audience.
- 4 Made-In is a cookware brand that believes in sustainability and long-lasting products. The company's packaging reflects this in a few ways. Firstly, the packaging itself is made from recyclable materials with no single use plastic. The packaging can also be used to send old pots and pans to Made-In to be melted down into materials to make new cookware.

Packaging customisation and branding offer businesses unique opportunities to differentiate themselves in a competitive marketplace. Whether it's through custom-printed boxes, personalised packing tape, or other branded packaging materials, businesses can effectively convey their brand identity, engage customers, and leave a lasting impression. By leveraging packaging materials as a strategic marketing tool, businesses can achieve long-term success in today's dynamic, e-commerce-based business landscape.

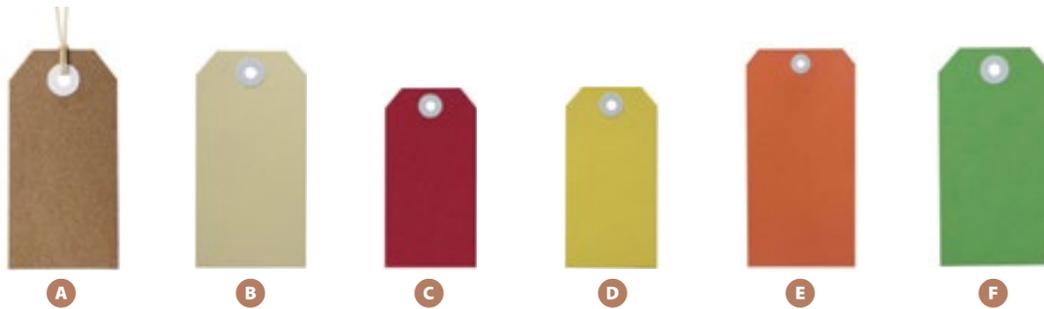

STRING, LASHING & TWINE

Ensure the safety and security of your packages and parcels with high-quality **Twine**. Offers durability, strength, and environmental consciousness, catering to all your packaging needs. Despite its light construction, the twine retains strength even when exposed to wet conditions, ensuring parcels stay secure in transit. **White Cotton** and **Brown Jute** are lightweight with a relatively low breaking load. For those looking for a sustainable alternative, **HeapsGood Hemp Cords** are an excellent option. Made from 100% organic hemp, these cords are biodegradable and oil-free. **Polystring Lashing**, made from durable and safe polypropylene, has a minimum break force of 114kg, ensuring that even the heaviest shipments remain securely fastened throughout their journey.

EVERY® TAGS

Premium **Avery® Tag-It Tags** are conveniently pre-punched and include a 6" string for easy attachment to mailings, merchandise, and gifts. **Tag-It Tags** come with 6" vanilla strings for quick and convenient tagging experience. Crafted from durable manilla board with reinforced eyelets, **Avery® Tags Buff** withstands daily rigours without breaking or tearing. These versatile **Avery® Shipping Tags** feature a smooth dual-sided writing surface, ensuring your mailing information remains clear and easily identifiable. The Buff and Shipping Tags are unstrung, offering versatility for easy customisation, and feature reinforced holes to prevent tearing through the cardstock. These tags are compatible with laser and inkjet printers, ensuring a hassle-free labelling experience.

PRINTED PACKAGING TAPE

Enhance the security and protection of your parcels and cartons with **Printed Packaging Tapes**. Designed with an exceptionally robust acrylic adhesive for a durable seal that lasts. These high-impact printed tapes are ideal for all your general-purpose packaging needs, effectively reducing the risk of tampering. Whether it's clearly marking them as 'Fragile' or indicating a 'Security Seal,' these tapes ensure effortless identification, adding an extra layer of assurance to your shipments. For added precaution, opt for our 'Top Load' printed tape, designed to catch the attention of postal workers, couriers, and shipping crews, to handle packages with extreme caution and minimise the risk of mishandling during transit.

Everyday Packaging

COS® PACKAGING TAPE WITH RUBBER ADHESIVE

These heavy-duty **COS® Rubber Packaging Tapes** are suitable for all medium to heavy-weight applications. With a focus on durability and reliability, these tapes feature a natural rubber adhesive, unlike acrylic plastic adhesives, which may contain potentially hazardous chemicals, for a fast and permanent seal every time. Suitable for use in freezer and cool room applications. Crafted to withstand the rigours of shipping and handling, these tapes deliver consistent results, ensuring your packages arrive at their destination.

B	TAPE6850	Clear	48mm x 75m	Pkt6

COS® KRAFT TAPE

Secure your packages with **COS® Kraft Tape**, ideal for medium to heavy-duty applications. Its natural rubber adhesive ensures a quick, lasting seal on both standard and recycled cartons. Suitable for freezer and cool room use, it performs reliably in temperatures from -20°C to 70°C. Easy to tear by hand and writable for added convenience, this kraft tape delivers a strong, stretch-free hold, making it a dependable choice across various workplace settings.

COS® CLOTH, DUCT & GAFFER TAPES

COS® Cloth Tape features a durable polythene-coated polyester and cotton blend, making it an excellent choice for various applications. With its wearable construction, it can be effortlessly torn by hand, eliminating the need for scissors or cutting tools, making it ideal for quick repairs, binds, and seals. These waterproof **COS® Duct** and **Gaffer Tapes** feature hot-melt adhesive and extra-strong adhesion, ensuring materials remain secure and protected, even in wet conditions. Highly suitable for both everyday repair needs like book binding or heavy industrial and packaging applications.

Package Security: Strategies for Safe Shipping

Securing your packaging is a business-critical task, especially when handling high-value, sensitive, or regulated goods. Poor packaging can lead to tampering, losses, or even damage to your reputation. Whether you're managing bulk distribution or delivering fragile items, using the right materials and methods, like tamper-evident seals, reinforced cartons, and unbranded packaging can help reduce risk and maintain trust in your business.

Packaging Fragile or High-Value Items

When it comes to shipping fragile or high-value items, proper packaging is essential. This includes using sturdy boxes or containers that provide adequate protection against impacts and handling during transit. Cushioning materials such as bubble wrap, packing peanuts, or foam inserts should be used to cushion and immobilise the items, reducing the risk of breakage or damage.

For particularly delicate items, double boxing or using custom-designed packaging solutions may be necessary to provide an extra layer of protection. It's also important to ensure that items are securely wrapped and sealed within the packaging to prevent shifting or movement during transit.

Tamper Evident Seals for Protection

Tamper-evident seals are an effective way to enhance package security and deter unauthorised access or tampering. These seals are designed to indicate if a package has been opened or tampered with, providing visual evidence of any interference.

There are various types of tamper-evident seals available, including adhesive seals, security tapes, and shrink bands. These seals can be customised with unique markings or serial numbers for added security and traceability. By using tamper-evident seals, businesses can provide customers with peace of mind knowing that their shipments have not been compromised en-route.

Discreet Packaging

In addition to physical security measures, discreet packaging can enhance package security by concealing the contents and deterring theft during transit. This can be achieved by using plain, unmarked materials and avoiding labels or branding that attract attention. Keeping contents hidden helps reduce the risk of interception while maintaining customer privacy and confidentiality.

Reinforced Boxes

Reinforced boxes are another essential component of secure packaging. Made from durable materials like corrugated cardboard or plastic, they offer enhanced strength and protection for shipments.

Reinforced boxes are especially useful for heavy or bulky items that need extra support during transit. Using these boxes helps minimise the risk of damage, ensuring items arrive safely at their destination.

Rigid Mailers

Rigid mailers are ideal for shipping flat or compact items that need extra protection without the bulk of a box. Commonly used for shipping books, documents, and small tech like tablets or phone accessories, they prevent creasing, bending, or edge damage during handling and transit. Many rigid mailers also feature self-sealing closures and tamper-evident designs, making them a fast, secure, option for low-profile shipments.

Trackable Delivery Systems

Trackable delivery systems provide a crucial layer of security and accountability in package shipping. By allowing both senders and recipients to monitor the location and status of packages in real-time, trackable delivery systems minimise the risk of loss, theft, or mishandling during transit. Customers can receive notifications at various stages of the delivery process, from dispatch to arrival, enabling them to anticipate and prepare for package receipt.

Trackable delivery systems create a digital trail that serves as a deterrent to potential theft or tampering. In case of any discrepancies or concerns, the ability to trace the package's journey can help prompt intervention and resolution. By providing transparency, accountability, and peace of mind, trackable delivery systems contribute to improved package security and safe shipping practices.

Package security is a critical consideration for businesses involved in shipping fragile or high-value items. By implementing strategies such as tamper-evident seals, reinforced boxes, and discreet packaging, businesses can enhance the security of their shipments and provide customers with peace of mind knowing that their goods are safe and secure during transit. Investing in secure packaging not only protects the contents of shipments but also helps build trust and confidence with customers, leading to improved satisfaction and loyalty in the long run.

FELLOWES® MAILING & DOCUMENT ORGANISERS

This **Literature Sorter**, designed for effortless organising, offers an ideal solution for efficiently storing A4-sized forms, papers, files, brochures, mail, and more. Crafted with durable fibreboard for extended longevity, it ensures reliable and long-lasting organisation. Its user-friendly design facilitates seamless storage on tabletops, making it a valuable asset for any workspace or organisational setting.

BROTHER P-TOUCH LABELLERS & TZE LABELLING TAPES

Brother Labelling Machines provide flexible, cost-effective solutions to suit a variety of labelling needs across different industries. Designed for seamless operation, they use thermal printing technology, eliminating the need for ink cartridges and reducing ongoing costs. The **PT-H105** is a compact, handheld model ideal for on-the-go labelling, featuring Auto Design and Dec Mode functions for creative, professional results. For desktop use, the **PT-D460BT** offers a large display, full keyboard, and Bluetooth connectivity, making it perfect for workplace environments. For those needing wider custom labels, the **PT-P910BT** is a stylish, portable option that supports labels up to 36mm wide and features built-in Bluetooth for easy wireless printing. Eliminate the hassle of ink or toner with **Brother TZE Labelling Tapes**, offering a mess-free and cost-effective labelling solution. Crafted from ultra-clean polyethylene laminate, these tapes offer outstanding resistance to heat, fading, water, and chemicals. The easy-peel backing ensures smooth, quick application, saving you time and effort with every label.

DYMO® SHIPPING & ADDRESS LABELS

Discover the convenience of using **DYMO® Shipping & Address Labels**, featuring an ultra-durable adhesive backing and a protective coating to prevent peeling or damage. The **DYMO® LabelWriter™ Thermal Labels** are easily customisable and use direct thermal printing technology, eliminating the need for messy ink or toner cartridges. These labels ensure visibility on packages and are suitable for various applications, allowing for quick and easy customisation. Packaged in rolls, they enable effortless printing of one or hundreds of labels, making them a valuable asset in any workplace. With easy-to-peel functionality and pre-cut paper labels, the labels provide convenience and efficiency. These thermal rolls are compatible with Dymo® LabelWriter™ label printers*. To ensure compatibility, refer to your Dymo® LabelWriter™ printer's user manual, as different models may have specific roll size requirements.

SPECIALITY LABELS

AVERY® DOT STICKERS & RECTANGLE LABELS

These versatile, multi-coloured **Avery® Dot Stickers** are a breeze to use thanks to their easy-peel backing and removable adhesive for a mess-free application. With a convenient dispenser, these labels streamline tasks such as file organisation, container labelling, or signage creation, providing swift and reliable labelling solutions. Packaged in convenient dispenser rolls, **Avery® Rectangle Dispenser Labels** ensure ease of use and feature a durable adhesive backing for swift and secure labelling that stays in place.

AVERY® ADDRESS DISPENSER LABELS

Perforated for easy separation, **Address Labels by Avery®** come in an easy-to-use roll format, allowing you to print labels quickly and efficiently while saving you time. These labels offer ample space and have a rectangular shape, making them suitable for both handwriting and typing. Comes with a permanent self-adhesive backing to keep the labels in place while transporting or moving the letters, envelopes, or packages. Suitable for frequent usage as labels are dispensed from a roll, making them ideal for 1 by 1 labelling.

Packaging Solutions for Every Office Need

From retail to education, healthcare to logistics, packaging plays a crucial role in protecting goods, streamlining operations, and shaping customer experiences.

With growing attention on sustainability and smart supply chain practices, packaging is no longer solely about getting things from A to B - it's about how we do it, and the impact it leaves behind.

No two businesses are the same. That's why it's important you have a variety of mailroom and packaging solutions designed to support a wide range of needs - whether your focus is eco-conscious practices, efficient logistics, or cost-effective materials.

Recyclable & Biodegradable Materials

If your business is striving to reduce its environmental impact, switching to recyclable and biodegradable packaging is one of the simplest and most effective steps you can take. Compostable mailers made from cornstarch or other plant-based materials break down naturally without leaving harmful residue. Recycled cardboard is sturdy, cost-effective, and gives packaging a second life, while plant-based plastics are an emerging alternative to traditional petroleum-based plastics.

Eco-friendly packaging products tick both the durability and sustainability boxes. From biodegradable satchels to recycled mailing boxes and kraft wrapping paper, these solutions are ideal for schools, offices, and businesses that want to align their packaging with sustainability goals - without compromising on protection or performance.

Smart Packaging

In an increasingly digital world, packaging has evolved from a static material into a smart tool for engagement and tracking. Whether you're shipping school equipment or sensitive health supplies, integrating smart packaging features can enhance transparency and safety.

Temperature-sensitive labels are ideal for pharmaceuticals or food-related products, while tamper-evident seals give peace of mind that parcels haven't been interfered with. RFID tags and barcodes simplify inventory tracking and reduce errors across logistics systems. Even better, QR codes can be added to packages to trigger videos, care instructions, or feedback forms, enhancing the unboxing experience and strengthening customer connections.

Minimalist & Lightweight Solutions

Less is more - especially when it comes to packaging. Reducing the amount of material used per shipment helps cut costs, lower carbon emissions, and reduce landfill waste, all while keeping products safe in transit.

Think lightweight void fill, compact satchels, and right-size boxes that reduce dead space. With the right packaging design, even delicate items can be shipped safely without excessive bubble wrap or bulky containers.

Minimalist, protective packaging supplies, such as slimline envelopes, flat-pack boxes, rigid mailers, and smart wrapping options balance sustainability and functionality. This is especially useful for schools and offices managing regular post or bulk mailouts, where efficiency and eco-performance go hand-in-hand.

Reusable Packaging

More businesses are embracing reusable packaging as part of a circular economy model - and it's easy to see why. Returnable mailers, durable tote boxes and bags, and reusable pallet wraps reduce waste, lower long-term costs, and signal a genuine commitment to sustainability.

Reusable shipping products are designed for multiple uses, making them ideal for internal deliveries across school campuses or multi-location organisations. Many schools and businesses in the education and healthcare sectors use these solutions to streamline resource distribution while slashing their environmental footprint.

Reusable options are particularly appealing for subscription services, product returns, and any business with a regular customer base - helping reduce waste at scale without sacrificing practicality.

As the way we work, learn, and shop continues to evolve, packaging needs to do more than just protect contents. It needs to support sustainability goals, enable smarter logistics, and create positive, lasting impressions.

At MOS, we are here to help businesses and education providers find packaging solutions that suit their needs today - and tomorrow. Whether you're looking for compostable satchels, tamper-proof seals, minimalist mailers, or reusable delivery tools, our wide selection of Mailroom and Packaging supplies has you covered.

Efficient Labelling and Addressing Solutions

A disorganised mailroom can lead to lost packages, delayed deliveries, and frustrated customers, but with the right tools and systems in place, mailrooms can become hubs of efficiency, accuracy, and professionalism. From schools to businesses, efficient labelling and addressing solutions are essential for keeping operations smooth and customers happy.

Each organisation has unique needs, so having a variety of tools to support speed, precision, and sustainability is essential to transforming your mailroom into an efficient operation.

Thermal Printers: Fast, Reliable Labelling

For bulk shipments and high-volume labelling, thermal printers are the go-to solution. Using heat instead of ink, they produce sharp, smudge-free labels in seconds - no drying time, no mess.

Ideal for busy mailrooms, retail, and large offices, they deliver speed, precision, and reliability with every print.

Eco-Friendly Label Sheets: Sustainability Meets Style

If sustainability is a priority, eco-friendly label sheets are a smart choice. Made from recyclable or biodegradable materials, they're a greener alternative to traditional labelling options.

Available in pre-printed or blank formats, eco-friendly labels are easy to use and offer a polished, sustainable alternative to handwritten notes.

Handheld Labelling Machines: On-the-Go Accuracy

For smaller tasks or when mobility matters, handheld labelling machines are a must-have. These portable devices let you quickly create and apply labels - no handwriting needed.

Custom Stamps: Professional Branding Made Easy

Custom stamps are a simple yet stylish way to add return addresses, logos, or personalised details to your packages. Perfect for businesses looking to enhance their branding while maintaining efficiency in the mailroom.

With just one quick press, you can add a polished touch to envelopes or parcels - no need for repetitive handwriting or expensive pre-printed materials.

Smart Organisation Systems: Keeping Mailrooms Flowing

A well-organised mailroom is crucial for avoiding bottlenecks and delays. Smart systems like sorting stations and barcode scanning can save time and reduce errors across the board.

- **Sorting Stations:** Clearly labelled bins or shelves make it easy to categorise mail by type or priority.
- **Barcode Scanning:** Automate tracking and routing processes to minimise misplaced items.
- **Real-Time Tracking Software:** Monitor incoming and outgoing packages at a glance for better oversight.

These systems ensure that every package moves smoothly from point A to point B without unnecessary hold-ups.

Certifications

As the number of certifications in the market increase it can get confusing. Use this reference guide to decide which certification best meets your business needs.

AFRDI

Provides standards, testing, product certification and research for buyers and sellers of furniture. AFRDI certified products show what level of AFRDI approval was achieved in three key areas: Toughness, Durability and Safety.

Fairtrade®

Fairtrade® represents better prices, decent working conditions, local sustainability, and fair terms of trade for farmers and workers in the developing world. Fairtrade® unique product offering allows you to support Fairtrade® products which provides hope for tomorrow.

Australian Certified Organic

Australia's largest certifier for biodynamic and organic produce, ACO provides certification to suppliers from all sectors. If a product sports the ACO logo, it is compliant with national production standards, and that product can be traced all the way back to its origin.

Forest Stewardship Council (FSC)®

An international network which accredits independent 3rd party organisations who can certify forest managers and forest product producers to FSC® Standards. FSC® partnership among businesses, the public sector and civil society provides a unique tool for dealing with the issues surrounding forestry. FSC® promotes environmentally appropriate, socially beneficial, and economically viable management of the world's forests.

B Corp®

B Corp certification recognises companies that meet high standards of social responsibility and environmental sustainability. B Corps prioritise creating a positive impact on employees, communities, and the environment, fostering a more sustainable and equitable global economy.

Good Environmental Choice Australia (GECA)

GECA sets the standard of environmental measures for a product's performance against relevant and primary environmental loads associated with a product's life cycle.

Carbon Reduction Institute (CRI)

The Carbon Reduction Institute encourages businesses to lower their carbon emissions. Their carbon neutral certification guarantees that the company in question has minimised and offset the carbon emissions involved in the production and distribution of the product.

Programme for Endorsement of Forest Certification (PEFC)™

PEFC™ works throughout the entire forest supply chain to promote good practice in the forest and ensures products are produced to the highest ecological, social and ethical standards. PEFC™ certification identifies for buyers the wood and paper products that support the sustainable management of forests.

CO2 Neutral

CO2 neutral products are made possible by calculating the CO2 emissions produced in the product's life cycle.

Rainforest Alliance™

An independent seal of approval which ensures that goods and services were produced in compliance with strict guidelines protecting the environment, wildlife, workers and local communities. Rainforest Alliance™ links businesses to conscientious consumers who identify their goods and services through the Rainforest Alliance Certification™.

Energy Star

ENERGY STAR reduces the amount of energy consumed by a product by either automatically switching it into a 'sleep' mode when it's not being used and/or reducing the amount of power used when in 'standby' mode. ENERGY STAR helps save money on electricity bills and the environment by reducing greenhouse gas emissions.

SupplyNation

SupplyNation connects First Nations businesses with corporate and government buyers in Australia, creating opportunities for First Nations businesses to compete for business. SupplyNation creates these opportunities by providing an essential link between purchasers and sellers.

EU Ecolabel

The EU Ecolabel helps consumers to choose – and encourages business to market – sustainable, eco-conscious, high quality products. The aim is to minimise the environmental impact of products from production to consumption.

UTZ Certified™

UTZ Certification™ sets the standards for responsible coffee sourcing and production. UTZ gives an independent assurance of sustainable production and sourcing, and offers a real-time traceability of agricultural products back to their origin.
