Specialist Services

Take advantage of our specialist services, which provide expert consultancy and innovative solutions in a number of areas.

Branded Workwear

Quality hi-vis workwear, office wear and event apparel for all industries from mining to finance, retail to transport, and hospitality to health care. We'll work with you to develop a uniform range that upholds your brand identity as well as keeps your staff looking sharp and safe.

First Aid Valet Service

First aid kits aren't just a legal requirement for your business, they are vital for a healthy, happy and secure workplace. If you need help making sure your first aid is kept fully stocked and everything within shelf life, ask about our First Aid service.

Reference Symbols

New products recently introduced to our range

Best Seller

Most popular and top selling products at MOS

Warranty

Length of warranty covered for the product

Worksmart

Products that are cleverly designed or innovative

Australian Made

Products that are manufactured or made in Australia

Lightweight

Products that are available in lightweight versions

UV

Products with UV percentage levels

Sustainability Symbols

Planet Friendly

A product earns the Planet Friendly symbol if it meets one of the following criteria: recyclable, reusable, biodegradable, compostable, comprises at least 20% recycled materials, certified for environmental responsibility, or made from sustainable resources

Recycled Content

Products that contain at least 20% recycled materials - % of recycled content is indicated

Recyclable

Products that are recyclable after use in regular kerbside or via recycling programs

Biodegradable

Products that breakdown through natural processes, leaving no harmful residues

Compostable & Biodegradable

Products made of organic matter biodegrades naturally in specific composting environments

Welcome to the MOS Workplace Safety & First Aid Catalogue

At MOS, we believe that the foundation of every successful business lies in the health, safety, and wellbeing of its people. Creating a workplace in which employees feel safe, supported, and valued isn't just a legal responsibility; it's essential for building a positive, productive culture where people can do their best work.

That's why we've created a comprehensive Workplace Safety & First Aid Catalogue to help Australian businesses stay safe, healthy, and compliant.

From everyday protection to emergency preparedness, our range includes PPE, workwear, respiratory and height safety gear, eyewash stations, spill kits, signage, and more. We also offer sustainable first aid kits, defibrillator accessories, and custom-branded options for workwear, hard hats, kits, and signage, helping you protect your team while promoting your brand.

With a name meaning 'Pathway' in the language of the Bidjigal people, Muru has remained true to its commitment to paving the way for future generations. As a testament to this dedication, over the last decade, Muru Office Supplies has evolved into purpose-driven and community-focused organisation that is majority First Nations owned and operated.

With over 80% of our dedicated team of First Nations descent, we bring a unique perspectives and expertise to our collective mission. As a 100% Australian-owned company certified by Supply Nation, we prioritise both commercial success and social impact.

Since 2014, Muru Office Supplies and Muru Group have contributed more than \$974,000 to First Nations communities by donating 20% of MOS profits and 15% of Muru Group profits. These contributions support key areas including Education, Employment, and Health & Wellbeing, demonstrating the impact of choosing suppliers that value diversity and inclusivity.

Thank you for choosing MOS as your partner in workplace health and safety.

Mitchell Ross

Mitchell Ross
CEO

Why MOS?

Australia's Largest First Nations Majority Owned Office Products Supplier with the Best range.

FIRST NATIONS OWNED

In 2012, Mitchell Ross, a proud Bidjigal man, founded Muru Group to make a lasting difference for First Nations peoples and became a catalyst for positive change and a pathway to a brighter future. In 2014, Muru Group partnered with COS® to form Muru Office Supplies a majority First Nations owned and operated workplace products supplier.

Muru, meaning 'Pathway,' has become one of Australia's largest First Nations majority-owned and operated workplace supplies companies, offering a wide range of products for every room in the office.

Over 80 percent of employees are of First Nations descent, empowering their collective mission through their unique perspectives and expertise. Certified by Supply Nation, Muru dedicates a percentage of profits to support First Nations communities in education, employment, health, and wellbeing.

EXPANSIVE PRODUCT RANGE

Muru Group, a strong advocate for First Nations businesses, launched a stationery product line in 2014 featuring unique designs by a First Nations artist. This initiative not only contributes to the development of sustainable First Nations communities but also promotes cultural representation in the workplace.

The success of the range is evident in the strong sales performance, with millions of Muru Group products sold to date and revenue continuing to grow year on year across office supplies, copy paper, and everyday kitchen and bathroom essentials. Popular items are the Muru Notebooks and Muru 100% Recycled Paper, showcasing their appeal and commitment to sustainability. By incorporating First Nations aesthetics, Muru promotes cultural understanding, diversity, and sustainable development in First Nations communities.

COMMUNITY MINDED

Each purchase from Muru, supports First Nations communities with over \$974,000 contributed since 2014. In North Queensland, Muru supports an Early Childhood Education Program, giving over 30 children free access to structured play-based learning and new equipment each year. Through Her Futures Foundation, Muru supports First Nations women in NSW and WA via tailored programs in education, employment, and mentoring.

Muru also partners with DeadlyScience to employ a First Nations team member, delivering culturally relevant STEM programs to over 800 schools, nationwide, with a focus on expanding access in regional and remote communities. In Sydney, Muru contributed \$14,000 to Mudgin-Gal 'Women's Place,' creating a safe, empowering space with vital resources and skills programs. Since 2019, Muru has also supported IndigiGrow by funding two trainee roles, helping First Nations youth gain horticultural training and cultural knowledge.

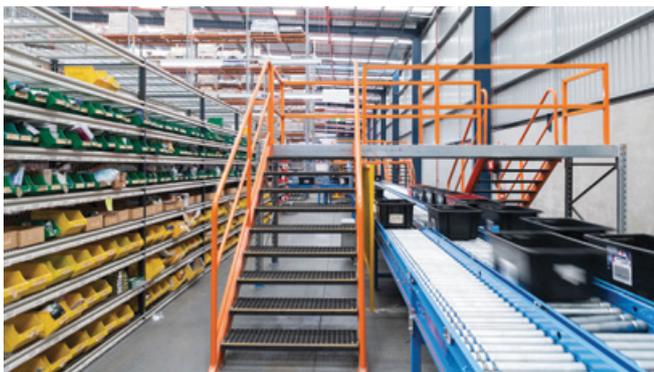

LOCAL WAREHOUSE & DELIVERY

Muru is powered by COS®, who have invested heavily in creating a nation-wide presence, with an extensive network of sales offices, warehouses and distribution centres across Australia. Each branch is tailored to local requirements and delivers a local service experience.

Our warehouses are quality assured, state-of-the-art facilities with advanced technology to ensure industry leading order accuracy. We maintain all our logistical services in-house with the flexibility to provide a range of additional services.

COMPLETE ORDERING SOLUTION

We thrive on creating innovative solutions for the workplace of the future. Our online ordering system, MOSnet, has been designed with our customers in mind and with intuitive time saving features.

Fast Ordering

- Create unlimited favourites lists
- Build an order over time
- Your login will retrieve all your personal preferences
- Easy repeat ordering
- Online returns
- Set and forget your regular orders using Scheduled Orders

Advanced Searching

- Narrow your search by brand or eco-conscious
- Easy to use toner & ink finder
- Speak to a MOSnet specialist on Live Chat
- Real-time local warehouse stock availability
- Compare feature
- Prediction searching
- Barcode scanning

Increased Control

- Password and security access
- Easy order tracking with order delivery updates
- Savings alternatives offered for better value
- Apply your procurement business rules including authorisation process
- Instant itemised monthly and year-to-date expenditure reporting
- Nominate a delivery date that suits you

Specialist Range

Explore our specialist range, designed to showcase the best we offer in each category, with a focus on boosting your team's health, productivity, and safety.

KITCHEN & HYGIENE

A clean and hygienic workplace is essential for staff wellbeing, reducing the spread of illness, and enhancing productivity. Beyond safety and health, a well-stocked kitchen is the key to keeping your team hydrated and nourished throughout the day. Discover our range designed to support wellness and efficiency, ensuring your team's health, happiness, and safety.

- Beverages & Snacks
- Kitchen Appliances
- Hygiene Essentials
- Cleaning Liquids & Chemicals

FIRST NATIONS

Our First Nations product range is carefully curated from businesses that are owned and operated by First Nations peoples. At MOS, we are committed to supporting suppliers who not only create meaningful impact within their communities by offering ethically produced products to Australian workplaces, but also foster community growth and sustainability. A portion of our profits is dedicated to enhancing education, employment, and health initiatives that benefit First Nations communities.

Our diverse range of First Nations products includes:

- Office & Education Products
- Kitchen & Catering
- Cleaning & Hygiene

ECO-CONSCIOUS RANGE

As organisations prioritise social, economic, and environmental sustainability, opting for eco-friendly products is key to corporate responsibility. By partnering with MOS, you gain access to our eco-conscious expertise and solutions. We offer a range of sustainable options, including recycled paper, FSC-certified stationery, eco-friendly office furniture, and supplies designed to minimise your carbon footprint while supporting a healthier planet.

- Kitchen & Cleaning Supplies
- Recycled Copy Paper
- Writing Instruments & Education Supplies
- Office Furniture

EXCLUSIVE RANGE

Explore MOS Exclusive Brands for premium products that offer great value without sacrificing quality. Our carefully selected range provides smart, cost-effective choices across various categories, designed to meet and exceed your needs. Leveraging our decades of expertise to deliver specialised solutions to enhance the productivity, health, and safety of your team.

- Office Furniture & Technology Accessories
- Bathroom & Cleaning Supplies
- Binding, Mailroom, & Packaging
- Education, Writing & Paper

MAILROOM & PACKAGING

Whether you're managing a bustling office or a busy warehouse, our comprehensive product range is designed to meet your specific needs and exceed your expectations. Discover a world of efficient and innovative solutions designed to streamline your operations. From high-quality mailing supplies to durable & sustainable packaging options, we've got everything you need to ensure your items are packed securely and delivered on time.

- Sustainable Packaging Solutions
- String, Lashing & Printed Packaging Tape
- Mailers, Tubes, & Mailroom Accessories
- Labelling Machines & Rolls

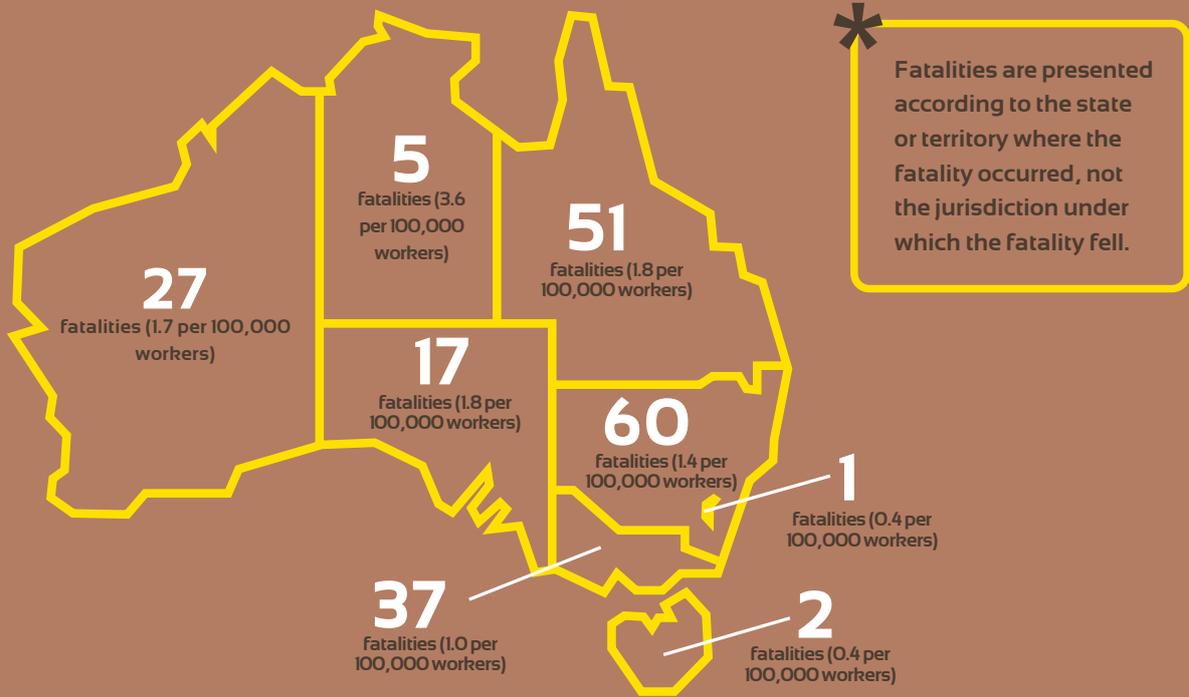

TECHNOLOGY & FURNITURE

Elevate your office environment with our state-of-the-art technology, modern furniture, and ergonomic solutions designed to maximise productivity and enhance comfort. Whether you're upgrading your technology, revamping your office furniture, or improving workplace ergonomics, our specialist solutions help you create a dynamic, efficient, and inviting workspace.

- Ergonomic Accessories
- Furniture & Storage
- Collaborative Education Furniture
- Technology Essentials

The Importance of PPE in the Workplace: Protecting Your Most Valuable Asset

Your employees are more than just part of your team, they're your business's most valuable asset. Ensuring their safety isn't just about complying with the law; it's about fostering a productive, engaged workforce. In industries where hazards are unavoidable, providing proper Personal Protective Equipment (PPE) is critical for keeping your team safe. From healthcare to warehousing, the right PPE can make all the difference in preventing injuries and maintaining a safe, efficient workplace.

More than a Legal Requirement

In Australia, the Work Health and Safety Act 2011 requires employers to provide appropriate PPE to safeguard workers from hazards. But beyond legal compliance, using PPE demonstrates a company's commitment to its people. While engineering controls and safe work practices are vital, PPE is the last line of defence when other measures can't completely eliminate risks.

Think about it - PPE is your team's armour against dangers like harmful substances, heavy machinery, and hazardous environments. Here's how it helps protect employees from a range of potential injuries:

- **Cuts and abrasions:** Gloves, safety glasses, and protective clothing shield workers from scrapes and cuts.
- **Burns:** Heat-resistant gloves and aprons protect against burns from hot surfaces or chemicals.
- **Eye injuries:** Safety glasses and face shields guard against debris, chemicals, and harmful radiation.
- **Hearing loss:** Earplugs or earmuffs defend against noise-induced hearing damage.
- **Respiratory Issues:** Masks prevent inhalation of hazardous fumes, dust, and gases.
- **Falls:** Safety harnesses, helmets, and non-slip footwear prevent falls, especially in construction and warehousing.
- **Traffic accidents:** Safety belts, high-visibility clothing, and protective equipment keep transportation workers safe on the road.

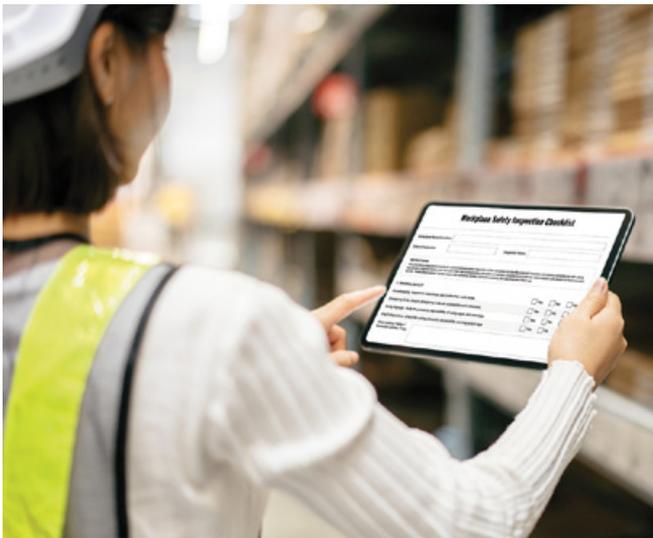

But simply providing PPE isn't enough, it must be used correctly and consistently, which is where many businesses fall short.

Reducing Injuries and Saving Lives

The stats are clear: PPE saves lives. Safe Work Australia reports that effective use of PPE has led to a marked decrease in workplace injuries. Respiratory protection in mining and construction has reduced occupational lung disease, while eye protection in manufacturing has prevented countless injuries from debris and chemicals.

However, PPE's effectiveness depends on more than just putting it on. Quality, training, and correct usage are all crucial factors. High-quality PPE that meets Australian standards can mean the difference between a near miss and a serious injury. Equally important is regular workplace inspections to address new or emerging hazards.

But here's something that might surprise you: even the best PPE is ineffective if employees don't use it properly. This brings us to the biggest challenge in workplace safety compliance.

From Compliance to Culture

One of the biggest hurdles in implementing PPE isn't the cost or availability, but ensuring employees actually wear it. Workers may resist PPE because it's uncomfortable, restricts movement, or they simply don't understand the risks. It's up to employers to educate their teams about the importance of PPE and ensure it's not only suitable for the job but also comfortable to wear.

Involving employees in the PPE selection process can make a huge difference. When workers have a say in the equipment they use, they're more likely to wear it consistently. Consider asking for feedback on comfort and practicality, and adjust your choices accordingly.

Building a culture of safety is also key. PPE shouldn't be viewed as an annoyance - it's a tool that protects health, safety, and wellbeing. By fostering a safety-first mindset, you can ensure that PPE is used effectively across your workplace.

Investment, Not Expense

It's easy to think of PPE as an added cost, but the reality is that investing in safety pays off in the long run. Workplace injuries lead to lost productivity, higher insurance premiums, legal liabilities, and damaged employee morale. The reputational damage from failing to protect your workers can also be substantial, affecting your ability to attract both talent and customers.

By contrast, a commitment to safety is demonstrated through proper PPE and training, can improve employee retention and engagement. When workers feel valued and protected, they're more likely to perform at their best, leading to increased productivity and a stronger bottom line.

A Non-Negotiable for Success

In today's competitive business landscape, safety is more than a checkbox - it's a cornerstone of success. Equipping your employees with the right PPE and ensuring they use it correctly doesn't just prevent injuries; it fosters a safer, more productive workplace. By making employee safety a priority, you're investing in the long-term wellbeing of your team and your business.

Reducing the Environmental Impact of PPE

Although no hard data exists for Australia at this time, a 2021 British study of the environmental impact of PPE for health and social care workers in the first six months of the COVID pandemic paint a stark picture. The carbon footprint of the PPE distributed in those six months in 2020 amounted to approximately 106,478 tonnes of CO₂.

The disposal of personal protective equipment (PPE) in Australia has become a significant environmental concern, especially since the onset of the COVID-19 pandemic. Every year, a considerable amount of PPE waste is generated.

During the 2020-2021 period, Australia produced an estimated 75.8 million tonnes of waste, a portion of which includes discarded PPE. Despite efforts to improve waste management and recycling, PPE contributes significantly to the growing volume of waste sent to landfills.

With Australia's recycling rate for plastics, including PPE, standing at just 13%, most of this waste ends up in landfills, worsening environmental challenges. As PPE use continues, addressing the environmental impact of its disposal is critical.

What Constitutes PPE

PPE comes in many forms, as different industries have different hazards that people need to be protected from.

Medical PPE

The focus of the study mentioned above is focused on PPE used primarily in a medical setting, such as:

- **Gloves:** Used to protect hands from exposure to bodily fluids and infectious agents.
- **Face Masks and Respirators:** Surgical masks and N95 respirators protect the nose and mouth from airborne particles and droplets.
- **Gowns and Aprons:** Worn to protect the body and clothing from contamination.
- **Face Shields and Goggles:** Protect the eyes from splashes and sprays of infectious materials.
- **Shoe Covers:** Worn over shoes to prevent contamination of footwear in sterile environments.
- **Caps and Hair Covers:** Protect against contamination in environments like operating rooms.

Industrial PPE

Industrial PPE is designed to protect workers from hazards in industrial settings. Examples include:

- **Hard Hats:** Protect the head from falling objects and impacts.
- **Safety Glasses and Goggles:** Shield the eyes from debris, chemical splashes, and other hazards.
- **Earplugs and Earmuffs:** Protect hearing from loud noises in environments like construction sites or manufacturing plants.
- **High-Visibility Clothing:** Enhances worker visibility in low-light or high-traffic areas.
- **Safety Boots and Shoes:** Provide foot protection against punctures, slips, and heavy objects.
- **Respirators:** Protect against inhalation of harmful dust, fumes, and chemicals.
- **Gloves:** Many industries require distinct levels of hand protection.

The Problem with PPE Disposal

Despite how common PPE is, disposing of PPE sustainably is challenging for several reasons:

- **Material Composition:** Many PPE items, like masks, gloves, and gowns, are made from non-biodegradable synthetic materials, such as plastics and composites. These materials are durable and difficult to break down in landfills.
- **Contamination:** PPE used in industrial or medical settings often encounters hazardous substances, including chemicals, biological contaminants, or infectious agents. This contamination makes it unsafe to recycle or reuse these items without specialised treatment processes.
- **Recycling Complexity:** The mixed-material construction of PPE, such as respirators that combine plastic, metal, and fabric, or Hi-Vis clothing that combine fabric and plastics complicates recycling. Each material type needs to be separated, a process not always workable on a large scale.
- **Lack of Infrastructure:** Many regions lack the infrastructure to properly collect, process, and recycle PPE. Without adequate facilities, most PPE ends up in landfills or incinerators, contributing to environmental pollution.

What Can We Do?

PPE is a necessity for many, if not most industries, but even with the difficulties of disposing of PPE, there are still things an organisation can do to limit their PPE carbon footprint.

Eco-Friendly Options

Masks, gloves, and some other forms of medical grade PPE typically don't have eco-friendly options due to the need for specific materials to meet exacting standards, but that isn't the case for all PPE.

Uniform and HiVis clothing manufacturer Portwest offers a range of HiVis polos, long sleeves and jackets made from recycled PET bottles and feature 100% recycled polyester.

Each garment guaranteed a set number of PET bottles have been recycled in creating it, with 11 PET bottles recycled to make polos, 14 PET bottles for long sleeves, and a whopping 36 PET bottles recycled to make each fleece jacket.

By opting for eco-friendly high visibility gear, organisations can ensure that their workers are safe and visible in all conditions, while still limiting their carbon footprint.

Specialised Recycling Services

While recycling PPE can be very difficult due to the materials involved or the materials potentially being contaminated, it is not impossible. Specialised recycling solutions for PPE are available across Australia.

TerraCycle PPE Recycling Boxes offer an innovative solution for the sustainable disposal of personal protective equipment such as masks, gloves, and face shields. These boxes are designed to collect used PPE items, which are then sent to TerraCycle recycling facilities for processing. The collected PPE is sanitised to remove contaminants and recycled into raw materials that can be used to manufacture new products, reducing the environmental impact of PPE waste.

By utilising specialised PPE recycling programs such as those offered by TerraCycle, organisations can show a commitment to sustainability while addressing the growing challenge of PPE waste disposal.

How to Avoid Common PPE Mistakes?

Personal Protective Equipment (PPE) is a critical part of workplace safety, particularly in industries where employees are exposed to various hazards. However, even the highest quality PPE can fail if not used correctly. Common PPE mistakes such as improper fit, poor maintenance, or selecting the incorrect type of gear can undermine safety measures and increase the risk of injuries. For any business, understanding and avoiding these errors are essential for ensuring a safe and compliant work environment.

1. Improper Fit of PPE

One of the most common mistakes in using PPE is an improper fit. Loose gloves can reduce dexterity and increase the likelihood of cuts, while an ill-fitting respirator may not provide adequate protection against inhaling harmful dust or fumes.

How to Avoid: Provide PPE that is available in a range of sizes to accommodate all employees. Fit testing, particularly for respiratory masks, is crucial to ensure a proper seal and effective protection.

2. Poor Maintenance and Lack of Regular Inspections

PPE requires regular maintenance and inspection to still be effective. Depending on the industry and the gear, some PPE even require frequent replacing. Helmets can become brittle over time, gloves can develop holes, and respirators can lose their filtering capability. Neglecting to inspect PPE for wear and tear or not maintaining it according to manufacturer guidelines can lead to its ineffectiveness.

How to Avoid: Implement a regular inspection and maintenance schedule for all PPE. This includes checking for signs of damage and ensuring that components like filters and seals are replaced as needed.

3. Selecting the Wrong Type of PPE

Using the wrong type of PPE for a specific task is a significant risk that can lead to serious injuries. Using general-purpose gloves isn't ideal for handling chemicals. Wearing regular eyewear instead of safety glasses can leave eyes unprotected from splashes or debris. This mistake often occurs when there is a lack of understanding of the specific hazards present in the workplace.

How to Avoid: Conduct a thorough risk assessment to identify all potential hazards in the workplace and determine the proper PPE for each task. Ensure that the selected PPE meets Australian standards for the specific hazards it is intended to protect against.

4. Inadequate Training

Even with the right PPE, if employees do not know how to use it properly, it will not provide the intended protection. A common issue is assuming that employees understand how to correctly wear, adjust, and maintain their PPE without formal training. This can lead to incorrect usage, such as not securing straps properly, not replacing disposable PPE when needed, or using damaged equipment.

How to Avoid: Provide comprehensive training on the correct use of PPE, including how to wear it, how to check for damage, and how to store it properly. Training should be part of the onboarding process for new employees and regularly refreshed to ensure that all workers remain knowledgeable.

How to Avoid: Establish clear policies on the lifespan and replacement schedule of all PPE. Ensure that employees are aware of these policies and know when and how to request replacements. Keep an inventory of PPE and monitor its usage to anticipate when replacements will be needed. Employers should also consider bulk purchasing to ensure that replacement stock is always available.

5. Ignoring Comfort and Usability Issues

While safety is the primary concern, comfort and usability also play crucial roles in using PPE. Uncomfortable PPE can lead to non-compliance, with workers either not wearing it at all or removing it during their tasks.

How to Avoid: Involve employees in the selection process of PPE to ensure that the equipment is not only safe but also comfortable for daily use. Consider ergonomics and climate when choosing PPE. Lightweight, breathable materials can make a significant difference in compliance. Employers should also encourage feedback from workers on the comfort and functionality of PPE.

6. Failure to Replace PPE When Necessary

PPE has a finite lifespan and using it beyond its intended period of effectiveness is a common mistake that can compromise safety. Whether due to cost-saving measures or simply oversight, extending the use of PPE such as worn-out gloves, expired respirators, or faded high-visibility clothing is a risk that can lead to injuries or exposure to hazards.

7. Overlooking the Importance of PPE Compatibility

Compatibility issues can arise in workplaces where multiple types of PPE are required. For example, wearing a helmet may interfere with the fit of ear protection, or safety glasses may not fit well under a respirator. These issues can lead to reduced effectiveness of one or both pieces of equipment, increasing the risk of injury.

How to Avoid: Consider how different types of equipment will be used together. Some manufacturers design PPE systems with compatibility in mind, so it may be beneficial to select equipment from the same provider. Testing the combined PPE in real work scenarios can help identify and resolve any compatibility issues before they become a problem.

Avoiding common PPE mistakes is crucial in maintaining a safe and compliant workplace. By addressing these errors, businesses can safeguard their employees and foster a culture of safety that benefits everyone.

Workplace Safety & First Aid

From everyday essentials to specialised safety solutions, our product range is tailored to meet the diverse needs of various industries, helping businesses safeguard their employees and minimise workplace risks.

Whether you're refreshing first aid supplies or enhancing safety protocols, MOS offers the right products to ensure your workplace remains safe, compliant, and prepared for any emergency situation.

PRO CHOICE® VISITORS SAFETY GLASSES

The Pro® Choice Visitors Safety Glasses are ideal for everyday use and can be worn over prescription glasses. Combines modern design and functionality, featuring one-piece lens for an unobstructed 180-degree vision.

QUICK GUIDE TO RESPIRATOR RATINGS

Choose the right mask for the job and make sure your staff are properly protected.
Standards: AS/NZS 1716:2012

Particles generated mechanically like silica, flour and dust. Suitable for large particles (>1 micron) released in operations like drilling, sanding, cutting and crushing etc.

Particles created either mechanically or thermally eg. Welding fume. Featuring a higher capture efficiency to protect you from smaller, thermally generated particles. Also recommended for specific infection control applications.

Particles from toxic materials and/or when the conditions require very high protection
E.g: Radioactive particle.

FACE SHIELDS

Stay protected with full **Face Shield**, designed for maximum safety and comfort in hygiene-critical environments. The anti-fog PET lens meets EN 166, 167, and 168 standards and is TGA approved, providing clear vision while shielding against splashes, dirt, and body fluids like saliva and blood. Its adjustable headband ensures a secure, one-size-fits-all fit, while the flat-fold design makes storage and assembly quick and easy.

QUICK GUIDE TO RESPIRATORY HAZARDS

When inhaled, these substances can cause irreversible damage to the lungs. Stay safe and choose the mask that's suited to the job.

GASES

Behave like air at room temperature. Can be odourless and difficult to detect.

FUMES & VAPOURS

Created by the evaporation of materials at high heat, such as welding or plastic fumes.

DUSTS

Fine particles created from crushing, sanding, grinding and brushing, or fine material fibres.

MISTS

Fine droplets of liquid from sprays, fog, aerosols.

3M™ REUSABLE RESPIRATORS

Upgrade your safety with the **3M™ Reusable Respirator**, designed for comfort and durability. Featuring a lightweight, low-profile design, this half facepiece provides a secure fit and reliable protection against airborne contaminants. Its easy-to-adjust straps and comfortable silicone seal ensure all-day wearability. Choosing the Correct Workplace Safety Signs

Clear and visible safety signs are crucial to preventing accidents and injuries in the workplace. Understanding the meaning of different safety signs and knowing which ones to use for various situations is essential. By meeting WHS requirements and using the right signage, you can help keep both staff and visitors safe.

1 AEDs

Clear and well-placed AED signs are crucial for saving lives during cardiac emergencies. They ensure that Automated External Defibrillators (AEDs) are quickly located and accessed, enabling swift response times, which significantly increases the chances of survival and recovery.

2 Fire Safety Identification

Clearly labeling fire extinguishers with their classifications is vital for safety. It ensures that users can quickly identify the correct extinguisher for specific fire types, reducing response time and preventing the use of the wrong equipment in emergencies.

3 Hazards

Signage indicating potential hazards, like forklifts in use, is an important aspect of workplace safety. It alerts employees and visitors to dangers, encouraging caution and helping prevent accidents. Clear hazard signs ensure everyone remains aware and vigilant in high-risk areas.

4 Safety First

Appropriate safety signs, like speed limits in parking lots or maximum capacity notices, are essential for preventing accidents and ensuring safety. They provide clear guidance, help manage risks and ensure everyone understands and follows the rules in shared spaces.

5 Required PPE

Signage indicating required PPE in the workplace is vital for WHS as it ensures employees are aware of necessary protective gear. This helps prevent injuries, promotes compliance with safety standards, and fosters a culture of health and safety in the workplace.

6 Portable Signage

Portable signs like "Caution Wet Floor" or "Out of Order" are crucial for workplace safety. They provide immediate, clear warnings about temporary hazards, helping to prevent accidents and injuries by alerting employees and visitors to potential dangers in real time.

SAFETY SIGNS

Safety Signs have been proven to reduce risk and prevent injury in the workplace. Create awareness of hazards and protective gear requirements by posting signs in clear sight, this will keep you, your staff and guests safe and protected. All signs are designed to meet the requirements of Australian Standard 1319.

POLYPROPYLENE			
	SIGN1057	Hearing & Eye Protection	225Wmm x 300Hmm Ea
A	SIGN1058	Eye Protection	225Wmm x 300Hmm Ea
	SIGN1059	Foot Protection	300Wmm x 450Hmm Ea
	SIGN1061	Hi Visibility or Vest	300Wmm x 450Hmm Ea
B	SIGN1062	Protective Equipment	900Wmm x 600Hmm Ea
	SIGN1513	Hand Protection	450Wmm x 300Hmm Ea
	SIGN1517	Register At Office	450Wmm x 600Hmm Ea

WARNING SIGNS

Warning Signs are the ideal way to reduce risk and injury by alerting staff and visitors to potentially dangerous hazards. Made from high-quality, scratch-resistant, durable materials, these warning signs are designed to meet the Australian Standard AS1319.

POLYPROPYLENE			
A	SIGN1063	Forklifts in Use	300Wmm x 450Hmm Ea
B	SIGN1065	Beware of Vehicles	225Wmm x 300Hmm Ea
	SIGN1388	Watch Out for Pedestrians	600Wmm x 450Hmm Ea
	SIGN1518	Caution Battery Charge Area	600Wmm x 450Hmm Ea
	SIGN1521	Warning Forklifts in Use	600Wmm x 450Hmm Ea

DANGER SIGNS

Warn staff and visitors of potential risk by clearly posting signs where danger lurks. These signs are durable, high quality and are designed to meet the Australian Standard AS1319.

POLYPROPYLENE			
A	SIGN1066	Danger Do Not Enter	225Wmm x 300Hmm Ea
	SIGN1069	Danger Hazardous Chemicals	225Wmm X 300Hmm Ea

DURABLE® SECURITY FRAMES

An ideal solution for signage in the workplace, these self-adhesive **Magnetic Sign Holders** can be easily changed, while the twin-coloured magnetic frames mean important information is protected. Frame colour complies with ISO 3864-4 for safety colours, usable on metal surfaces. The **Magnetic Note** features a magnetic front panel with a convenient cut-out, allowing you to write directly onto the document inside. Comes with a built-in pen and pen holder, and the self-adhesive frame can be reused on different smooth surfaces.

SIGN2101	Security Magnetic Sign Holder	A4	Red & White	Pkt2
A SIGN2102	Security Magnetic Sign Holder	A4	Yellow & Black	Pkt2
SIGN2103	Security Magnetic Sign Holder	A4	Green & White	Pkt2

PRATT® EYE & FACE WASH STATION

The **Pratt Combination Shower Eye & Face Wash** is designed to operate as an individual shower or face wash, or both simultaneously. Made from 304 stainless steel to provide a long service life, the eye & face wash features six aerated nozzle outlets for a soft and even water pattern designed to safely and efficiently handle any workplace accident.

FIRST9915	Combination Shower	Ea

Workplace Safety Matting

Did you know?

Slips, trips, and falls account for 23% of all workplace injuries in Australia.

According to Safe Work Australia, these accidents can lead to serious harm and costly compensation claims. Beyond the physical toll, they can create lasting financial strains for businesses.

But there's a simple and effective solution: safety matting. Occupational Health and Safety (OHS) regulations require employers to take proactive measures to prevent accidents, and investing in high-quality safety mats is one of the easiest ways to keep your team safe and comfortable. The Australian Safety and Health Certification Board (ASHCB) even noted in 2024 that businesses using safety matting are more likely to pass audits and avoid hefty fines or sanctions.

NON-SLIP MATTING: YOUR FIRST LINE OF DEFENCE

Non-slip matting isn't just a nice-to-have, it's essential for any workspace where spills, moisture, or heavy foot traffic are a part of daily operations. Safe Work Australia reports that proper safety matting can slash slip-related accidents by 35 percent. That's a huge win for workplace safety!

Non-slip mats, like the Mattek Esteem II Rib Mat and Mattek Safety Cushion Mat, not only help prevent accidents but also keep employees comfortable. Ribbed surfaces trap water, dirt, and debris, stopping them in their tracks before they spread throughout the building. For industries such as hospitality, manufacturing, and retail, this is crucial to maintaining a safe, clean, and efficient workspace.

ANTI-FATIGUE MATTING: COMFORT THAT WORKS HARD FOR YOU

In environments where employees are on their feet for long hours, anti-fatigue matting is a game-changer. These mats aren't just about comfort; they promote subtle movements that improve blood flow, reduce muscle strain, and keep workers feeling energised and productive throughout the day, preventing long-term health issues like varicose veins and joint pain.

Mats like the Mattek Ergo Tred Mat and Mattek Comfort Clean Rubber Mat deliver both comfort and safety. They're perfect for high-hygiene areas like commercial kitchens, laboratories, and healthcare facilities, offering easy maintenance and slip resistance, while providing essential ergonomic support that significantly reduces fatigue and discomfort over time.

ENTRANCE MATS: THE UNSUNG HEROES OF CLEANLINESS AND SAFETY

Australia's diverse weather ranges from torrential downpours to dusty winds and makes entrance mats essential for maintaining workplace safety and cleanliness. The Australian Building Codes Board (ABCB) reports that up to 80 percent of dirt, moisture, and debris is tracked indoors via footwear, contributing to slip hazards and increased cleaning efforts.

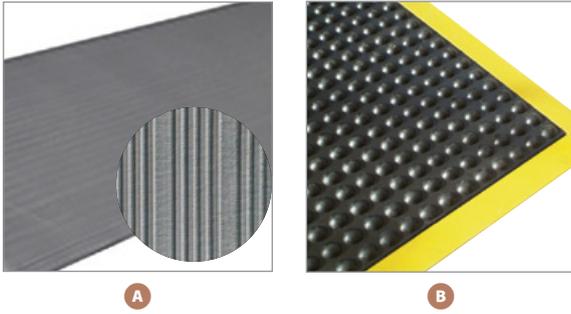

By investing in high-quality entrance mats like the Prestige Diamond Entrance Mat or the Absorba Entrance Mat, you're not only reducing the risk of slips and falls, but also preserving the cleanliness of your floors. These mats are built to withstand heavy foot traffic while effectively trapping dirt, moisture, and contaminants, keeping your workplace both safe and presentable, all while reducing maintenance costs.

OUTDOOR & HEAVY-DUTY MATTING: BUILT TO LAST

For outdoor or industrial settings, heavy-duty matting is essential. Durable outdoor mats made from natural coir fibre effectively scrape dirt and debris from shoes before workers enter the building, while heavy-duty indoor mats like the Mattek Soft Foot Mat provide long-lasting comfort, durability, and protection against harsh conditions.

These mats are ideal for high-traffic areas and hard surfaces, helping to reduce fatigue, minimise injury risk, and improve traction. They also enhance cleanliness by trapping dirt and moisture, while extending the lifespan of your flooring by preventing damage. In rugged environments, these mats ensure your team remains safe, productive, and comfortable throughout the day.

MATTEK® ANTI-FATIGUE MATTING

The **Mattek® Ergo Tred Mat** is designed to enhance workplace safety by reducing fatigue caused by prolonged standing. Constructed with durable, premium materials, the mat features a distinctive domed pattern that maximises comfort, helps prevent tripping, and promotes better circulation in the legs and feet. **Soft Foot Matting** is a light-duty anti-fatigue mat with a ribbed surface that provides traction and anti-trip beveled edges that allow for easy access.

B	MATS1514	Ergo Tred	Black / Yellow	900Wmm x 1200Lmm	Ea

MATTEK® WET AREA MATTING

The **Comfort Clean** is a heavy-duty, anti-slip mat made from 100% Nitrile rubber, which makes it resistant to greases, oils, and common chemicals. Features raised lugs for excellent traction and keeping the mat surface dry. The **Safety Cushion** is an anti-slip mat made from rubber compound which relieves strains from constant standing. The honeycombed surface provides superior grip in damp conditions, while drainage holes keep the mat surface dry to prevent slips and falls.

A	MATS1511	Comfort Clean	Black	900Wmm x 1500Lmm	Ea
B	MATS1521	Safety Cushion	Black	900Wmm x 1500Lmm	Ea

MATTEK® SAFETY MATTING

Comfort Link Solid are interlocking rubber tiles designed to form a desired shape and comes apart easily for cleaning. Used for anti-fatigue and anti-slip purpose in dry areas such as changing rooms. **Diamond Foot** is a non-slip mat made from durable vinyl sheeting bonded to thick closed-cell PVC foam. Features bevelled edges and yellow safety borders to warn of potential hazards.

CABLE SAFE MATS

Cable Safe Mat is a safe and effective way to eliminate tripping hazards. Specially formulated rubber back prevents mat from moving on slippery surfaces. Safety-proof your workplace and keep cables protected and tidy with **Nitrile Rubber Backed Mat**. Designed with a nylon border for increased visibility with textured surface to reduce slips and trips.

A	MATS1524	Rubber Mat	Black	500Wmm x 1000Lmm	Ea
B	MATS1525	Safe Rubber Mat	Black / Yellow	500Wmm x 1000Lmm	Ea

MATTEK® ENTRANCE MATTING

The **Mattek® Esteem Ribbed II** and **Absorba Mat** are expertly designed to provide durable, high-performance floor protection across both medium and high traffic areas. The **Esteem Ribbed II** features a smart bi-level construction that effectively scrapes and traps dirt, dust, and debris at entry points before it can spread indoors. By reducing the amount of grit and moisture carried inside, it helps maintain cleaner floors and lowers maintenance costs. The **Absorba Mat** offers a robust carpet surface combined with a non-slip rubber backing. This dual design delivers outstanding slip resistance and excellent moisture absorption, even in wet-weather conditions. Engineered for resilience, it withstands the impact of daily foot traffic and continuous wear, ensuring long-term durability while creating a safer, more welcoming environment.

B

MATTEK® OUTDOOR MATTING

The **Mattek® Coir Mat** is made from 100% natural coarse coconut fibre and reinforced with durable latex for long-lasting performance. Designed to withstand heavy foot traffic, this eco-friendly mat not only prevents shedding but also features sturdy latex edging to maintain its shape and integrity over time. Its exceptional moisture absorption keeps entrances cleaner and safer, while its natural fibres provide superior dirt control without compromising on style or sustainability.

MATS1522	Coir Outdoor Latex Edge		500Wmm x 90Lmm	Ea
-----------------	-------------------------	--	----------------	----

MATTEK® BOTTLE BRUSH MAT

Keep outdoor areas clean, safe, and welcoming with **Bottle Brush Mats**, crafted from a sturdy galvanised wire frame and tough natural coir (coconut fibres). Designed for heavy-duty use, these mats provide a powerful scrubbing action that effectively removes dirt, mud, and debris from footwear before it can be tracked indoors. The **Boot Scraper** style is specially engineered to clean both sides and the soles of shoes and boots, making it ideal for workplaces, farms, workshops, and busy entryways exposed to harsh conditions. Durable and weather-resistant, **Bottle Brush Mats** withstand constant use and outdoor exposure without losing shape or performance. Practical, reliable, and environmentally friendly, they provide an efficient first line of defence against dirt and moisture, keeping entryways safer, cleaner, and easier to maintain.

How to Keep your Staff Engaged in Safety Training

When it comes to safety it cannot be denied that all workplaces must have safety hazards, and all staff need regular safety training. Safety training can often be seen as a 'chore' as most staff don't see it as the most interesting or exciting part of their job. But, it's a necessary task that if done effectively, has the power to save lives. By making health and safety training more engaging, you will ensure that staff retain information and do not become complacent.

1 Use Hands-on Methods and Demonstrations

Many people prefer to 'learn by doing' to really absorb necessary information. When you try to teach your staff by lecturing or having them follow e-learning modules, they are much less likely to retain that information. This type of passive training relies heavily upon having a dynamic and exciting presenter to engage employees. For that reason, safety training should be delivered by using hands-on scenarios and demonstrations of safety hazards, to keep your staff actively engaged.

2 Use Real-life Examples

Relate examples of real-life incidents to your staff. This will help them to visualise the outcome of poor safety practices – making the risks more 'real' in their minds. Imagery and storytelling reinforce the message and brings to life what would otherwise be a 'dry' safety induction. You can even bring in speakers with a real-life story to talk to your staff on training day.

3 Use Humour

Plenty of research has found that humour boosts retention and engagement and helps you file information away in your long-term memory. Many workplaces use humour to engage their staff in safety training. A quick Google search will let you view hundreds of humorous safety videos meant to educate workers.

4 Utilise Technology with Interactive Training

Introducing new technologies allows for more engaging and innovative learning experiences. Virtual reality (VR) uses interactive and immersive techniques and is becoming increasingly more affordable. VR helps people learn new skills, be more creative and overcome barriers to learning. Having the power to transform the way we learn makes education more accessible, adaptable, and immersive.

5 Keep Open Communication with Positive Feedback

Engaging your staff in a conversation through open communication helps them to learn by asking questions and having an open discussion in a respectful learning environment. It's a good idea to have group discussions, so that you can identify gaps in their knowledge. This will help them to stay involved and 'own' safety in your workplace.

6 Make Activities Fun

Studies show that fun has a positive effect on motivation levels, determining what we learn and how much we retain. Organise some games for your team to play. This creates an engaging, low-risk, and low-pressure task for your staff to learn.

Everything You Need to Know About Fire Safety Gear

According to survey data collated by Fire and Safety Australia, workers around Australia are unprepared to deal with workplace fires, with fewer than half of the workers polled feeling confident about using a fire extinguisher. What's more, the same survey showed that only 25% of respondents were able to locate the nearest fire extinguisher, and only 13% of survey participants were aware that there are different categories of fire extinguishers.

5 Types of Fire Extinguishers

It is important to familiarise yourself with which fire extinguisher type can be used for which type of fuel. Using the incorrect type may not work or may cause a dangerous chemical reaction (for example, using water based fire extinguishers on a Class B, F, or electrical fires). In other cases, using the wrong fire extinguisher means that the fire can reignite after apparently being successfully extinguished.

<p>1</p>  <ul style="list-style-type: none"> ✓ CLASS A ✗ CLASS B ✗ CLASS C ✗ CLASS D ✗ CLASS E ✗ CLASS F <p>WATER</p> <p>Suitable for Class A fires only, and must never be used in any other instance, as it may cause a dangerous reaction.</p>	<p>2</p>  <ul style="list-style-type: none"> ✓ CLASS A ✓ CLASS B ✗ CLASS C ✗ CLASS D ✗ CLASS E ✗ CLASS F <p>FOAM</p> <p>Must only be used for Class A and B fires, not any other type of fire.</p>	<p>3</p>  <ul style="list-style-type: none"> ✓ CLASS A ✓ CLASS B ✓ CLASS C ✓ CLASS D ✓ CLASS E ✗ CLASS F <p>DRY POWDER</p> <p>This is effective on Class B and C fires. ---	--	--	--	---

✓ Safe to use ✗ DO NOT use

CLASS A - standard combustibles like wood, paper, and cloth
CLASS B - flammable liquids like petrol and oil
CLASS C - flammable gases like LPG or propane

CLASS D - combustible metals such as magnesium or lithium
CLASS E - electrical fires
CLASS F - cooking oils and fats

Fire Blankets

A fire blanket is a safety device designed to extinguish small fires by smothering them. Fire blankets are typically made from fire-resistant fiberglass or wool, treated with flame-retardant chemicals. Blankets work by cutting off the fire's oxygen supply, effectively putting out the flames. To use a fire blanket, it should be carefully placed over a fire, completely covering it to starve the fire of oxygen. Fire blankets are especially useful for kitchen fires involving oil or grease. They can also be wrapped around a person for protection during a fire emergency.

Fire blankets are versatile safety tools with several key uses:

- **Smothering Small Fires:** Kitchen fires involving oil or grease can be dangerous to extinguish with water.
- **Personal Protection:** A fire blanket can be wrapped around a person to protect them from flames and high heat.
- **Covering Burning Objects:** Cover and extinguish a burning object, such as a waste bin or small electrical fire.
- **Extinguishing Clothing:** Smother fires on clothing to prevent burns. Some types of fire extinguisher can cause irritation or damage is used directly on skin.

AB(E) DRY CHEMICAL FIRE EXTINGUISHERS

The **Dry Chemical Fire Extinguisher AB(E)** discharges a fine powder that absorbs fuel molecules, depriving the fire of a fuel source. Suitable for Class A, B, C, and E fires including wood, plastic and paper, flammable and combustible liquids, flammable gases, and electrical equipment. See below for available sizes and pertinent information.

All Dry Chemical Extinguishers are certified to AS/NZS 1841.5 for powder type AB(E) 70% MAP.

		FIRE RATING	CYLINDER VOLUME	FULL WEIGHT	
A	SAFE2700	Powder AB(E) 1.0kg 1A:20B:E	1.0L	2.4kg	Ea

DEPENDAPLAST

The next generation of Pilfer proof plasters

• Convenient • Cost effective • Ready to apply

Innovation makes us stick...

Better for the workplace, better for the planet with new sustainable paper wrap packaging.

Sustainable paper wrap 100% waterproof

STEP 1.
Secure the Plaster Dispenser to the wall and stock with two wallets.

STEP 2.
Select the plaster of choice by holding and pulling on the top tab.

STEP 3.
Release the plaster by pulling upwards.

STEP 4.
Apply the plaster to the affected area.

PILFER PROOF PLASTER DISPENSER

The **Pilfer Proof Plaster Dispenser** provides a secure, hygienic, and convenient solution for classrooms, workplaces, sick bays, and kitchen areas. Features a wall-mounted design with a self-locking transparent lid to keep plasters clean and protected. The **Washproof Plaster Refills** allow for quick, one-handed access without touching the sterile side. The **Fabric Plaster Refills** are made from heavy-duty stretch fabric with a strong zinc oxide adhesive that ensures the plasters stay firmly in place. The Food Plaster Refills come in secure wallets of 35 plasters per pack, making them an ideal fit for the pilfer-proof dispenser.

A	FIRST2034	Dispenser	Green	30W x 280L x 480Hmm	Ea

WOUND CARE

FIRST AID DRESSING STRIPS

The Dependaplast range offers reliable protection with specialised plasters and tape. The **Washproof Plaster** features a thin, breathable PU film that blocks water, bacteria, viruses, and fungi, with a low-allergy adhesive and fun handprint design. The **Fabric Plaster** uses flexible, water-repellent fabric that stretches in all directions, ideal for joints, with strong zinc oxide adhesive. The **Blue Plaster** adds visibility for food areas and includes a metal-detectable strip for safety. **Washproof Spot Plasters** provide a secure, waterproof seal with breathable PE film. **Washproof Tape** is durable PVC, ideal for securing dressings in wet or food-safe environments.

EYE PAD DRESSINGS

The **Eye Pad Dressing** offers a reliable and hygienic solution for eye protection and wound care. Features a heat-sealed pad, ensuring sterility and washproof performance. Designed with a low-allergy adhesive, it provides gentle yet secure adhesion for sensitive skin. Individually wrapped for convenience and safety, these eye pads are TGA approved.

FIRST5002	Eye Pad Dressing No 16	Ea
------------------	------------------------	----

FINGER DRESSING

Designed specifically for fingers, this innovative pre-rolled **Finger Dressing** makes application quick and effortless. Injured fingers can be dressed easily without assistance, eliminating the need for scissors or additional tools.

FIRST5081	Finger Buddies Standard	Box100
------------------	-------------------------	--------

HSE DRESSING

These sterile **Dressings** with stretch bandages are HSE-compliant and ideal for first aid kits. Each has a non-adherent pad and long conforming bandage, individually wrapped for sterility.

A	FIRST5007	Sterile Dressing	Medium	Ea
B	FIRST5008	Sterile Dressing	Large	Ea

ADHESIVE DRESSING PADS

These **Adhesive Dressing Pads** feature a highly absorbent Relipad™ central pad to manage wound exudate, with breathable stretch fabric that conforms comfortably and stays in place.

A	FIRST5026	Adhesive Dressing Pad	50 x 75mm	Box10
B	FIRST5027	Adhesive Dressing Pad	100 x 75mm	Box50

ADVANCED LOW ADHESIVE DRESSINGS

ReliporeXtreme Dressings absorb up to 10x their weight with a low-adherence mesh that prevents strike-back. Flexible, breathable, and secure for everyday wound care.

FIRST5088	Relipore Xtreme Adhesive Dressing	8x16cm	Box50
------------------	-----------------------------------	--------	-------

NON ADHERENT DRESSINGS

These low-adherence **Dressing Pads** are double-sided, highly absorbent, soft, and conformable, ideal for minor abrasions and lacerations, effectively managing wound fluid.

FIRST5016	Low-Adherent Dressing Pads	75mm x 75mm	Box100	
A	FIRST5050	Low-Adherent Dressing Pads	50mm x 50mm	Box100
B	FIRST5051	Low-Adherent Dressing Pads	100mm x 100mm	Box100

TRUAMAFIX DRESSING

TraumaFix comes with an adjustable, non-adhesive dressing and pressure applicator to control bleeding. The ultra-absorbent pad stays sterile, with secure fastening for reliable, comfortable healing.

A	FIRST5031	TraumaFix Dressing	100 x 180mm	Ea
B	FIRST5032	TraumaFix Dressing	150 x 180mm	Ea

TRIANGULAR BANDAGES

Triangular Bandages provide support and immobilisation for arms, shoulders, and ribs. Single-use and versatile, they're ideal for slings and splints.

FIRST5004	Single Use Bandage	900 x 1270mm	Ea
------------------	--------------------	--------------	----

WOUND CLEANSING WIPES & PRE INJECTION SWABS

These alcohol-free **Cleansing Wipes** offer gentle and convenient skin care, using sterile 0.9% saline on soft fabric. **Pre-Injection Swabs** with 70% isopropyl alcohol provide an effective antibacterial solution to cleanse the skin safely.

A	FIRST5022	Alcohol-Free Wipes	Box100
B	FIRST5028	Pre-Injection Swabs	Box100
	FIRST5034	Alcohol-Free Wipes	Box20

MICROPOROUS TAPE

Non-stretch, high-tensile **Microporous Tape** is designed to provide rigid support for immobilising joints. Easy to tear by hand, it offers a convenient and reliable solution for securing dressings.

A	FIRST5054	Tape with Dispenser	25mm x 5m	Ea
B	FIRST5055	Microporous Tape	12.5mm x 10m	Ea
	FIRST5057	Microporous Tape	25mm x 5m	Ea

Essential First Aid Equipment for Every Workplace

Safety and wellbeing in the workplace are paramount. One critical aspect of ensuring a safe working environment is being prepared for medical emergencies. No matter the size or nature of the business, having the right first aid equipment on hand is crucial.

1 Comprehensive First Aid Kits

A well-stocked first aid kit is the cornerstone of workplace safety. These kits should be tailored to the specific needs and risks associated with the workplace, but there are essential items that every first aid kit should include.

Basic Items

Every first aid kit should include a variety of bandages, adhesive tape, gauze pads, antiseptic wipes, and adhesive bandages. These items are essential for treating minor cuts, scrapes, and burns. It's also important to have scissors and tweezers on hand for cutting bandages or removing foreign objects from wounds.

Wound Care Supplies

Sterile dressings, eye pads, and wound cleaning solutions like saline or antiseptic wipes are important for treating more significant injuries. Including triangular bandages can also be useful for creating slings or binding larger wounds.

Cold Packs

Cold packs are excellent for treating sprains, strains, or bruises. They help reduce swelling and pain in the immediate aftermath of an injury.

CPR Masks

Having a CPR mask in the kit ensures safe and effective mouth-to-mouth resuscitation. This piece of equipment is especially important in environments where employees may not be trained in advanced first aid techniques.

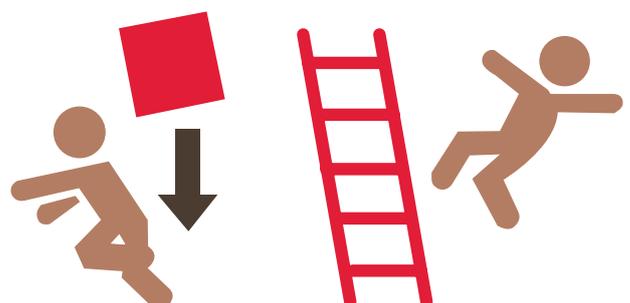

2 Eye Wash and Burn Treatment

Every first aid kit should include eye wash to treat eye injuries, especially in environments where there is a risk of chemicals or debris entering the eyes. Burn treatment supplies, such as burn cream or gel, should also be included to provide immediate relief and prevent infection in case of burns.

"According to Safe Work Australia, over the past ten years, there have been more than 1,880 fatalities from traumatic injuries and 1,165,100 serious workers' compensation claims, each involving over a week of lost work time. These figures highlight the urgent need for readily accessible first aid equipment in workplaces."

3 Automated External Defibrillators

Cardiac emergencies are one of the most serious medical incidents that can occur in the workplace. Having an Automated External Defibrillator (AED) on-site can be life-saving. AEDs are portable devices that deliver an electric shock to the heart, restoring normal rhythm during sudden cardiac arrest.

Accessibility and Training

AEDs should be placed in easily accessible locations, and employees should be trained on how to use them. Although AEDs are designed to be user-friendly with clear instructions, having trained personnel can ensure the device is used quickly and correctly.

Regular Maintenance

It's essential to conduct regular checks on AEDs to ensure they're functioning correctly. This includes checking the battery life, ensuring the pads are not expired, and that the device is ready for immediate use.

4 Splints and Bandages

For workplaces with a higher risk of injuries like fractures or sprains, having splints and a variety of bandages on hand is essential. Splints help immobilise injured limbs, preventing further injury and reducing pain until professional medical help arrives.

Rigid and Flexible Splints

Both rigid and flexible splints should be available to accommodate different types of injuries. Rigid splints provide firm support, while flexible splints can be moulded to fit the injured area more comfortably.

Elastic Bandages

These are essential for securing splints or dressings in place and providing support to sprains or strains. Elastic bandages also help reduce swelling and limit movement, aiding in the recovery process.

5 Antiseptics and Disinfectants

Keeping wounds clean and preventing infection is a top priority in first aid. Antiseptic solutions and disinfectants are necessary for cleaning wounds before applying dressings.

Alcohol-Free Solutions

It's important to include alcohol-free antiseptics in the first aid kit, as these are less likely to cause irritation, especially on sensitive skin or open wounds.

Multiple Applications

Antiseptic wipes, sprays, and creams should all be included to cover different types of injuries and areas of the body.

Hand Sanitiser

Although not technically first aid, hand sanitiser is essential for limiting the spread of germs and limiting the risk of infection before and after first aid and wound care.

6 Regular Training and Drills

While not a physical piece of equipment, regular training is a critical component of an effective first aid response. Employees should be trained in basic first aid procedures, CPR, and the use of AEDs. Regular drills can also help ensure that everyone knows what to do in an emergency.

Certification and Recertification

Employees should be encouraged to obtain first aid and CPR certification, with regular recertification to keep their skills up to date.

Emergency Response Plan

Every workplace should have a clear emergency response plan that includes procedures for medical emergencies. This plan should be regularly reviewed and practiced to ensure everyone is prepared.

Ensuring that a workplace is equipped with the necessary first aid supplies is not just about meeting regulatory requirements; it's about protecting the health and safety of everyone there. A well-stocked first aid kit, an accessible AED, and trained employees can make all the difference in an emergency.

South Australia mandates AEDs (Automatic External Defibrillators) in certain designated commercial buildings, facilities, and vehicles from January 2026*. Compliance matters, but saving a life matters more.

Be prepared for sudden cardiac arrest, when every second counts.

*For more details about the legislation in SA, please visit www.legislation.sa.gov.au

LIFEPAK® DEFIBRILLATOR

These **LIFEPAK® Defibrillators** are fully automatic AEDs, meticulously engineered to instill user confidence. The CR2 defibrillator is designed to minimise treatment delays and enhance care throughout the lifesaving process. Featuring the cutting-edge cprINSIGHT technology, it enables chest compressions to continue during ECG rhythm analysis. Each unit includes a carry case, USB cable, battery, and electrodes, along with an 8-year warranty on the AED units and a 4-year warranty on the batteries and electrodes.

SAFETY CHECKLIST

A comprehensive safety checklist helps identify potential hazards and ensures compliance with regulations. By systematically assessing different aspects of the workplace your business can implement necessary improvements and create a safer work environment.

Fire

Are fire extinguishers suitable for the types of fires likely to occur in your workplace (e.g., electrical, chemical)?

Are emergency exits clearly marked and unobstructed?

Are fire alarms and smoke detectors installed and regularly tested?

Is there a fire evacuation plan in place and communicated to all employees?

Electrical

Are electrical cords, plugs, and outlets in good condition and free from damage?

Is there proper signage for high-voltage areas?

Have electrical items been tested and tagged in the past 12 months?

Are employees aware of procedures for reporting electrical hazards?

General Lighting

Is lighting adequate in all areas of the workplace?

Are lighting fixtures regularly cleaned and maintained?

Are there any areas with poor visibility that need more lighting?

Is the emergency lighting operational?

Walkways

Are walkways clearly marked and clear of any obstructions?

Are non-slip mats or surfaces used in high-traffic areas?

Are walkways well-lit and maintained?

Are there clear signs for areas with potential slip or trip hazards?

Rubbish

Are rubbish bins and waste disposal systems in place and regularly maintained?

Are hazardous wastes handled and disposed of according to regulations?

Are there procedures for managing and recycling different types of waste?

Is there training for employees on proper waste disposal?

Work Benches

Is there adequate lighting for tasks performed on work benches?

Are tools and equipment stored properly to prevent accidents?

Are there safety features or guards in place for work benches?

Are work benches at an adequate height with no sharp edges?

Storage

Is storage organised to prevent tipping and falling of items?

Are shelves and storage units securely installed and maintained?

Are heavy items stored at lower levels to reduce the risk of injury?

Are there procedures for safe lifting and handling of stored items?

Chemicals

Are there Safety Data Sheets (SDS) available and up to date?

Are hazardous chemicals properly labelled and stored?

Are employees trained in handling and disposing of chemicals safely?

Are spill kits readily available and employees trained in their use?

First Aid

Are the contents of the first aid kits clean and orderly?

Is a first aid kit readily available and stocked with necessary supplies?

Are employees aware of the locations of the first aid kits?

Have you made sure your first aid kit contents aren't expired?

Office

Are office spaces clutter-free and organised to prevent trips and falls?

Are power cords and cables safely managed and secured?

Are desks and chairs ergonomically designed and in good condition?

Is there proper ventilation and air quality in the office?

Machines

Are machines regularly maintained and inspected for safety?

Are safety guards and emergency shut-off switches in place?

Are operators trained in the safe use of machinery?

Are there clear procedures for reporting machine malfunctions?

Display Material

Are all display materials clearly visible and properly placed?

Are safety signs and labels correct for the hazards they show?

Are there any sharp edges or other hazards associated with display materials?

Are there standard procedures for sign placement to ensure consistency and regulatory compliance?

WHS Information

Is WH&S information readily accessible to all employees?

Are WH&S policies and procedures up-to-date and communicated effectively?

Are safety notices and emergency contact numbers displayed prominently?

Are regular safety briefings and training sessions conducted?

Warehouse

Are warehouse areas free of clutter and obstructions?

Are forklifts and other machinery regularly inspected and maintained?

Are proper safety barriers or signage in place around hazardous areas or equipment?

Are emergency procedures and contact information clearly displayed in the warehouse?

Certifications

As the number of certifications in the market increase it can get confusing. Use this reference guide to decide which certification best meets your business needs.

AFRDI

Provides standards, testing, product certification and research for buyers and sellers of furniture. AFRDI certified products show what level of AFRDI approval was achieved in three key areas: Toughness, Durability and Safety.

Fairtrade®

Fairtrade® represents better prices, decent working conditions, local sustainability, and fair terms of trade for farmers and workers in the developing world. Fairtrade® unique product offering allows you to support Fairtrade® products which provides hope for tomorrow.

Australian Certified Organic

Australia's largest certifier for biodynamic and organic produce, ACO provides certification to suppliers from all sectors. If a product sports the ACO logo, it is compliant with national production standards, and that product can be traced all the way back to its origin.

Forest Stewardship Council (FSC)®

An international network which accredits independent 3rd party organisations who can certify forest managers and forest product producers to FSC® Standards. FSC® partnership among businesses, the public sector and civil society provides a unique tool for dealing with the issues surrounding forestry. FSC® promotes environmentally appropriate, socially beneficial, and economically viable management of the world's forests.

B Corp®

B Corp certification recognises companies that meet high standards of social responsibility and environmental sustainability. B Corps prioritise creating a positive impact on employees, communities, and the environment, fostering a more sustainable and equitable global economy.

Good Environmental Choice Australia (GECA)

GECA sets the standard of environmental measures for a product's performance against relevant and primary environmental loads associated with a product's life cycle.

Carbon Reduction Institute (CRI)

The Carbon Reduction Institute encourages businesses to lower their carbon emissions. Their carbon neutral certification guarantees that the company in question has minimised and offset the carbon emissions involved in the production and distribution of the product.

Programme for Endorsement of Forest Certification (PEFC)™

PEFC™ works throughout the entire forest supply chain to promote good practice in the forest and ensures products are produced to the highest ecological, social and ethical standards. PEFC™ certification identifies for buyers the wood and paper products that support the sustainable management of forests.

CO2 Neutral

CO2 neutral products are made possible by calculating the CO2 emissions produced in the product's life cycle.

Rainforest Alliance™

An independent seal of approval which ensures that goods and services were produced in compliance with strict guidelines protecting the environment, wildlife, workers and local communities. Rainforest Alliance™ links businesses to conscientious consumers who identify their goods and services through the Rainforest Alliance Certification™.

Energy Star

ENERGY STAR reduces the amount of energy consumed by a product by either automatically switching it into a 'sleep' mode when it's not being used and/or reducing the amount of power used when in 'standby' mode. ENERGY STAR helps save money on electricity bills and the environment by reducing greenhouse gas emissions.

Supply Nation

Supply Nation connects First Nations businesses with corporate and government buyers in Australia, creating opportunities for First Nations businesses to compete for business. Supply Nation creates these opportunities by providing an essential link between purchasers and sellers.

EU Ecolabel

The EU Ecolabel helps consumers to choose – and encourages business to market – sustainable, eco-conscious, high quality products. The aim is to minimise the environmental impact of products from production to consumption.

UTZ Certified™

UTZ Certification™ sets the standards for responsible coffee sourcing and production. UTZ gives an independent assurance of sustainable production and sourcing, and offers a real-time trace-ability of agricultural products back to their origin.
